Korakril™ Blend bathtubs

# Materiale | Material

## Korakril™ Blend

Ice white

Le vasche da bagno in Korakril™ Blend – il Korakril™ è un Solid Surface prodotto in Italia – sono opache e setose al tatto, vengono realizzate per colatura dentro degli appositi stampi utilizzati solitamente per ottenere forme morbide e ovoidali con spessori sottili. Non è possibile modificarne il profilo e le dimensioni a catalogo, ad eccezione della realizzazione di stampi ad hoc. Le vasche che hanno sagome morbide possono essere verniciate esternamente con laccatura Soft Touch, speciale trattamento che segue le dilatazioni del volume quando vengono riempite di acqua calda, o con argilla stesa a mano.

The bathtubs made in Korakril™ and Korakril™ Blend, are matt and soft to the touch, they are realized injecting the material into moulds to obtain mainly rounded edges and ovoid shapes with thin thickness. In this case, dimensions and aspect can't be modified expect by the realization of a bespoke mould. The bathtubs with rounded edges can be externally lacquered with Soft Touch paint, special treatment that follows the bathtubs dilatation when filled with warm water, or coated with clay.
