

SCHEMA PRODOTTO

BE WATER Lamp, linear and modular recessed kinetic decorative LED lamp

Design: Fernando Correa
Production: WAW COLLECTION, 2019

BE WATER Lamp is a recessed kinetic decorative LED lamp, designed by Fernando Correa creative director of **WAW COLLECTION**.

The light emitted by the lamp, through refraction, passes through the deformed borosilicate glass cylinder that rotates on its axis by means of a motor and thus projects upward fluctuating flares of light in continuous movement. The final effect is that of sunlight reflections which, breaking on the surface of the water, create dancing optical games on the surfaces they touch.

The lamp consists of a motor block unit, an anodized aluminum base support module with LED light source and one of cylindrical borosilicate glass with an irregular surface handmade, which makes each product different and unique. To create the desired effect, it is necessary to insert it inside a luminous groove grazing the wall.

The packaging includes a room fragrance and a QR Code from which you can listen to four recommended relaxing music playlists, inspired by the physical and alchemical element of

the water and other natural elements. These complements are proposed to offer a multisensory experience.

BE WATER Lamp can be purchased from a minimum of one to a maximum of five modules for motor, depending on the desired length and capable to be adapted within the world of wellness, hotels, restaurants, suitable for reception and waiting areas.

TECHNICAL INFORMATION

Materials: anodized aluminum, folded galvanized sheet, deformed borosilicate glass cylinder and acrylic

Light source opt. 1: LED, 2700 K, 9.6 W, CRI 90, 775 lm (each module)

Light source opt. 2: LED, 3000 K, 9.6 W, CRI 90, 864 lm (each module)

Light source opt. 3: LED, 4000 K, 9.6 W, CRI 90, 900 lm (each module) (upon request)

Certifications: IP20 and IP44 for humid environments

Power supply: - 220-230 Vac 50Hz
- 115 Vac 60Hz

WW1: Main module (850 mm)

— 2700 K, 16.6 W, 775 lm

— 3000 K, 16.6 W, 864 lm

— 4000 K, 16.6 W, 900 lm (upon request)

WW2: Main module + 1 Additional module (1640 mm)

— 2700 K, 26.2 W, 1550 lm

— 3000 K, 26.2 W, 1728 lm

— 4000 K, 26.2 W, 1800 lm (upon request)

WW3: Main module + 2 Additional modules (2430 mm)

— 2700 K, 35.8 W, 2325 lm

— 3000 K, 35.8 W, 2592 lm

— 4000 K, 35.8 W, 2700 lm (upon request)

WW4: Main module + 3 Additional modules (3220 mm)

— 2700 K, 45.4 W, 3100 lm

— 3000 K, 45.4 W, 3456 lm

— 4000 K, 45.4 W, 3600 lm (upon request)

WW5: Main module + 4 Additional modules (4010 mm)

— 2700 K, 55.0 W, 3875 lm

— 3000 K, 55.0 W, 4320 lm

— 4000 K, 55.0 W, 4500 lm (upon request)

ACCESSORIES

LIGHT UP YOUR SENSES / COMPLETE THE BE WATER lamp EXPERIENCE WITH COLOR VARIATIONS, SCENT AND SOUND

COLOR FILTERS:

First water, then fire with the ardor of its flames, air represented by the phenomenon of the northern lights and finally earth inspired by lavender fields in Provence, are the different color variations proposed thanks to accessory filters* that can be applied directly on the aluminum base.

BE FIRE: Red and orange

BE AIR: Blue and green

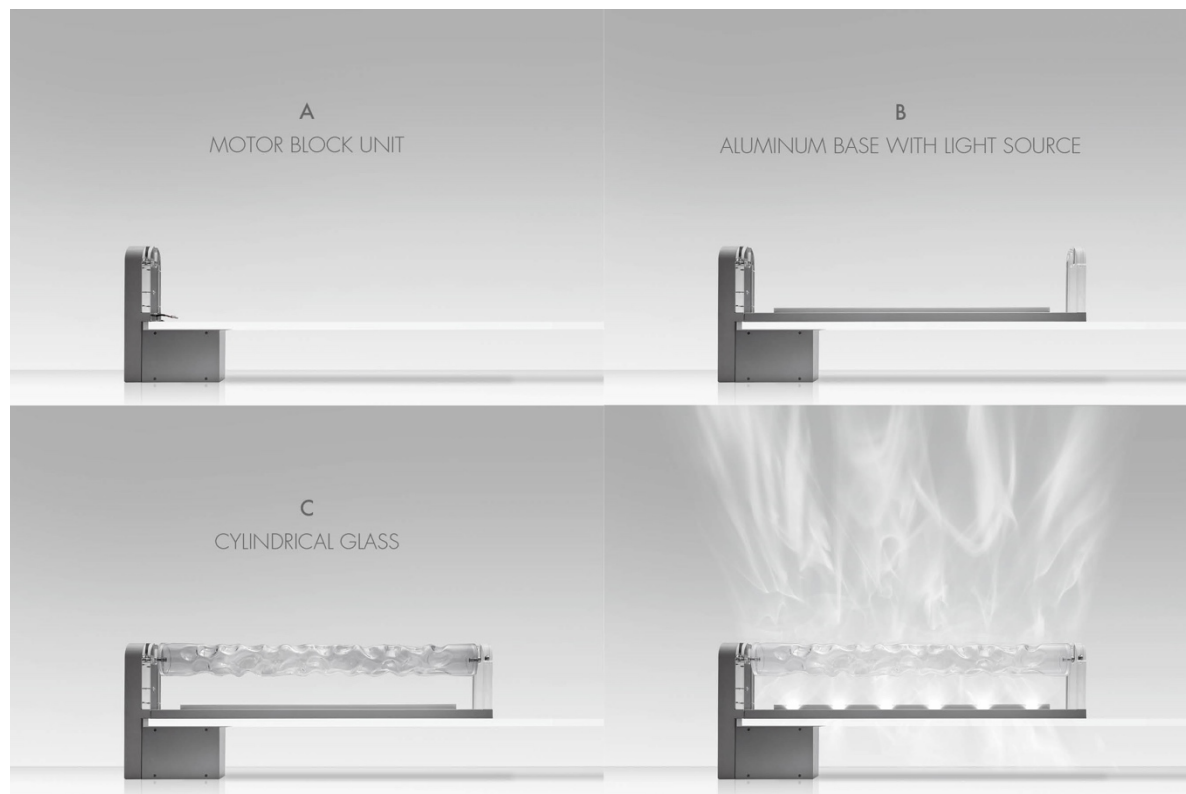

BE EARTH: Violet and Yellow

And FRAGRANCES* / SOUND:

Integra Fragrances has created for WAW COLLECTION bespoke room fragrances* inspired by the four elements. BE WATER Lamp and its chromatic and fragrance variations BE FIRE, BE AIR, BE EARTH are able to create a sensorial experience within the environment that hosts it, inviting you to immerse yourself completely in the contemplative suggestions of relaxation and well-being.

The packaging includes a 30 ml room fragrance sample and a QR Code from which you can listen to four recommended relaxing music playlists, inspired by WATER and the other natural elements. These complements are offered to complete your BE WATER lamp multisensory experience.
