### **LAMP TB-001, 002 & 003**

UNIQUE PIECES

MATERIAL: BRONZE

TECHNIQUE: WAX DIPPING & LOST WAX CASTING

### **PRESENTATION**

Presented for the first time at Collectible 2020, these 3 bronze lamps are part of the on-going 'Wax on/Wax off series'. These series are a collection of experiments of lost-wax casting and wax-dipping processes. The wax dipping is done with a self-made machine called TONK. TONK, a machine based on the old technique of candle dipping, was created to explore shapes and forms through a new medium. When combining the machine with the lost wax casting technique, a unique piece is produced every single time.

### **STUDIO NICOLAS ERAUW**

Nicolas Erauw is a designer based in his hometown of Sint-Niklaas, Belgium. His first acquaintance with design was through his carpentry studies during high school. In 2017, he graduated from the Royal School of Arts in Ghent with a specialisation in Furniture Design. Nicolas focuses on materials and processes, which add an industrial character to his work but also embraces the unexpected.
