

Create your own world through your bookcase with The Perfect Bookshelf

Brussels, May 2020: "Made in Belgium" design bookcase, The Perfect Bookshelf will this year be present at the Fuorisalone Digital in Milan as part of the Belgian team. Tailor-made furniture to the size of your books, The Perfect Bookshelf offers you the opportunity to create a unique and personalized bookshelf to your liking. As practical as it is aesthetic, it is easy to assemble, without the help of any glue or screws.

The Perfect Bookshelf, from concept to bookcase

Made from European poplar wood, The Perfect Bookshelf was born from the imagination of Brussels designer Alain Chennaux, creator of the patented TWU storage system.

For more than 30 years, Alain Chennaux has been developing patented and award-winning creations in various design salons. The Perfect Bookshelf patent was invented in 2009 and now comes in five different finishes.

Crafted in Brussels, in Alain Chennaux's workshop-store (located in Ixelles), The Perfect Bookshelf has since then conquered many Brussels interiors but also in the rest of Belgium and even Europe.

From manufacturing to your interior, a piece of furniture full of benefits

Infinitely flexible, The Perfect Bookshelf is designed to fit all types of books but also your office supplies, decoration and LP records. Finishes in white, black or rather natural wood? Highlight your interior, the bookshelf fits around the fireplace in the living room, under a staircase or in your bedroom. It is easily installed without the help of nails, screws or glue. The elements fit together quite simply.

The Perfect Bookshelf is made using durable, quality materials that are resistant to the various deterioration that a wooden piece of furniture can experience. The wood comes from sustainably managed European forests. You will not find MDF or OSB in the bookshelf boards, but you will find high-quality poplar multiplex. Chemical emissions from the manufacture of wooden furniture (such as formaldehyde) are also very low, ranking in the strictest European standard (E1). The Perfect Bookshelf, which is committed to ethical human work, pays all subcontractors involved in the manufacture of its furniture in a fair and equitable way, in compliance with European regulations.

Customers will also be able to find a quality service during the development of their new interior where they will be accompanied from start to finish. The Perfect Bookshelf is delivered throughout Belgium but also beyond its borders: in the Netherlands, Luxembourg, France, Germany... The aim of The Perfect Bookshelf is to become a European furniture reference.
