

GOBO LIGHTS

GOBO LIGHTS
Handmade lights from Belgium

Nicolas Brevers

Self-taught and coming from the world of chemistry, this Belgian craftsman/designer designs his pieces with as much meticulousness as in a laboratory.

He loves numbers and perfect proportions, with which he plays using the timeless laws of hallowed geometry to adorn the space of his atomic shapes.

Shapes with pure, light and contemporary lines that evoke the very essence of natural elements.

Balance & Emotion

- They are a witness to a new language where the rational and the functional dialogue with the emotional to create a hypnotising and soothing universe that is the designer's own.

Always searching for equilibrium, Nicolas Brevers creates objects where lightness rhymes with precision, purity with architecture and art with design.

ABOUT THE DESIGNER

The Studio Gobo Lights

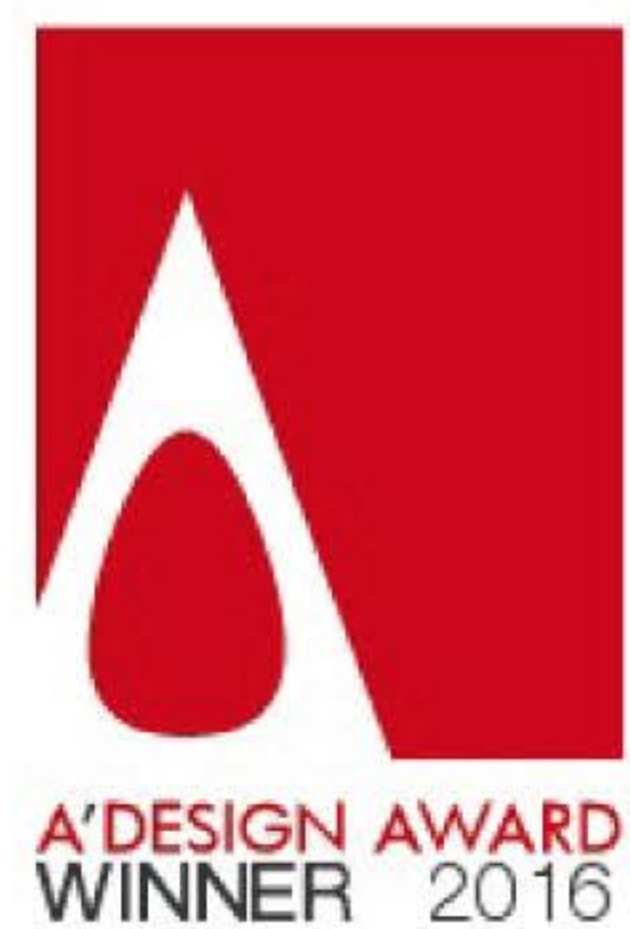

Gobolights conveys Nicolas Brevers' vision of design: playful kinetic art that results from research into aesthetics, harmony and balance.

The Gobolights design studio in Brussels specialises in the creation and production of upmarket contemporary lighting produced in small series and made to measure.

MADE IN BELGIUM

Gobolights is represented internationally by its presence at numerous fairs, such as the Salone del Mobile in Milan and Maison et Objets in Paris, and selected in 2016, 2017 and 2018 for the A design awards

VALUES & **KNOW-HOW**

In order to offer quality lighting, it is essential for the brand to master all the stages of creation within the studio. In addition, the partners and collaborators are selected according to the values of the brand.

Gobolights also works in close collaboration with distributors and resellers, interior designer and individuals.

BETWEEN CRAFTSMANSHIP & NEW TECHNOLOGYt

09

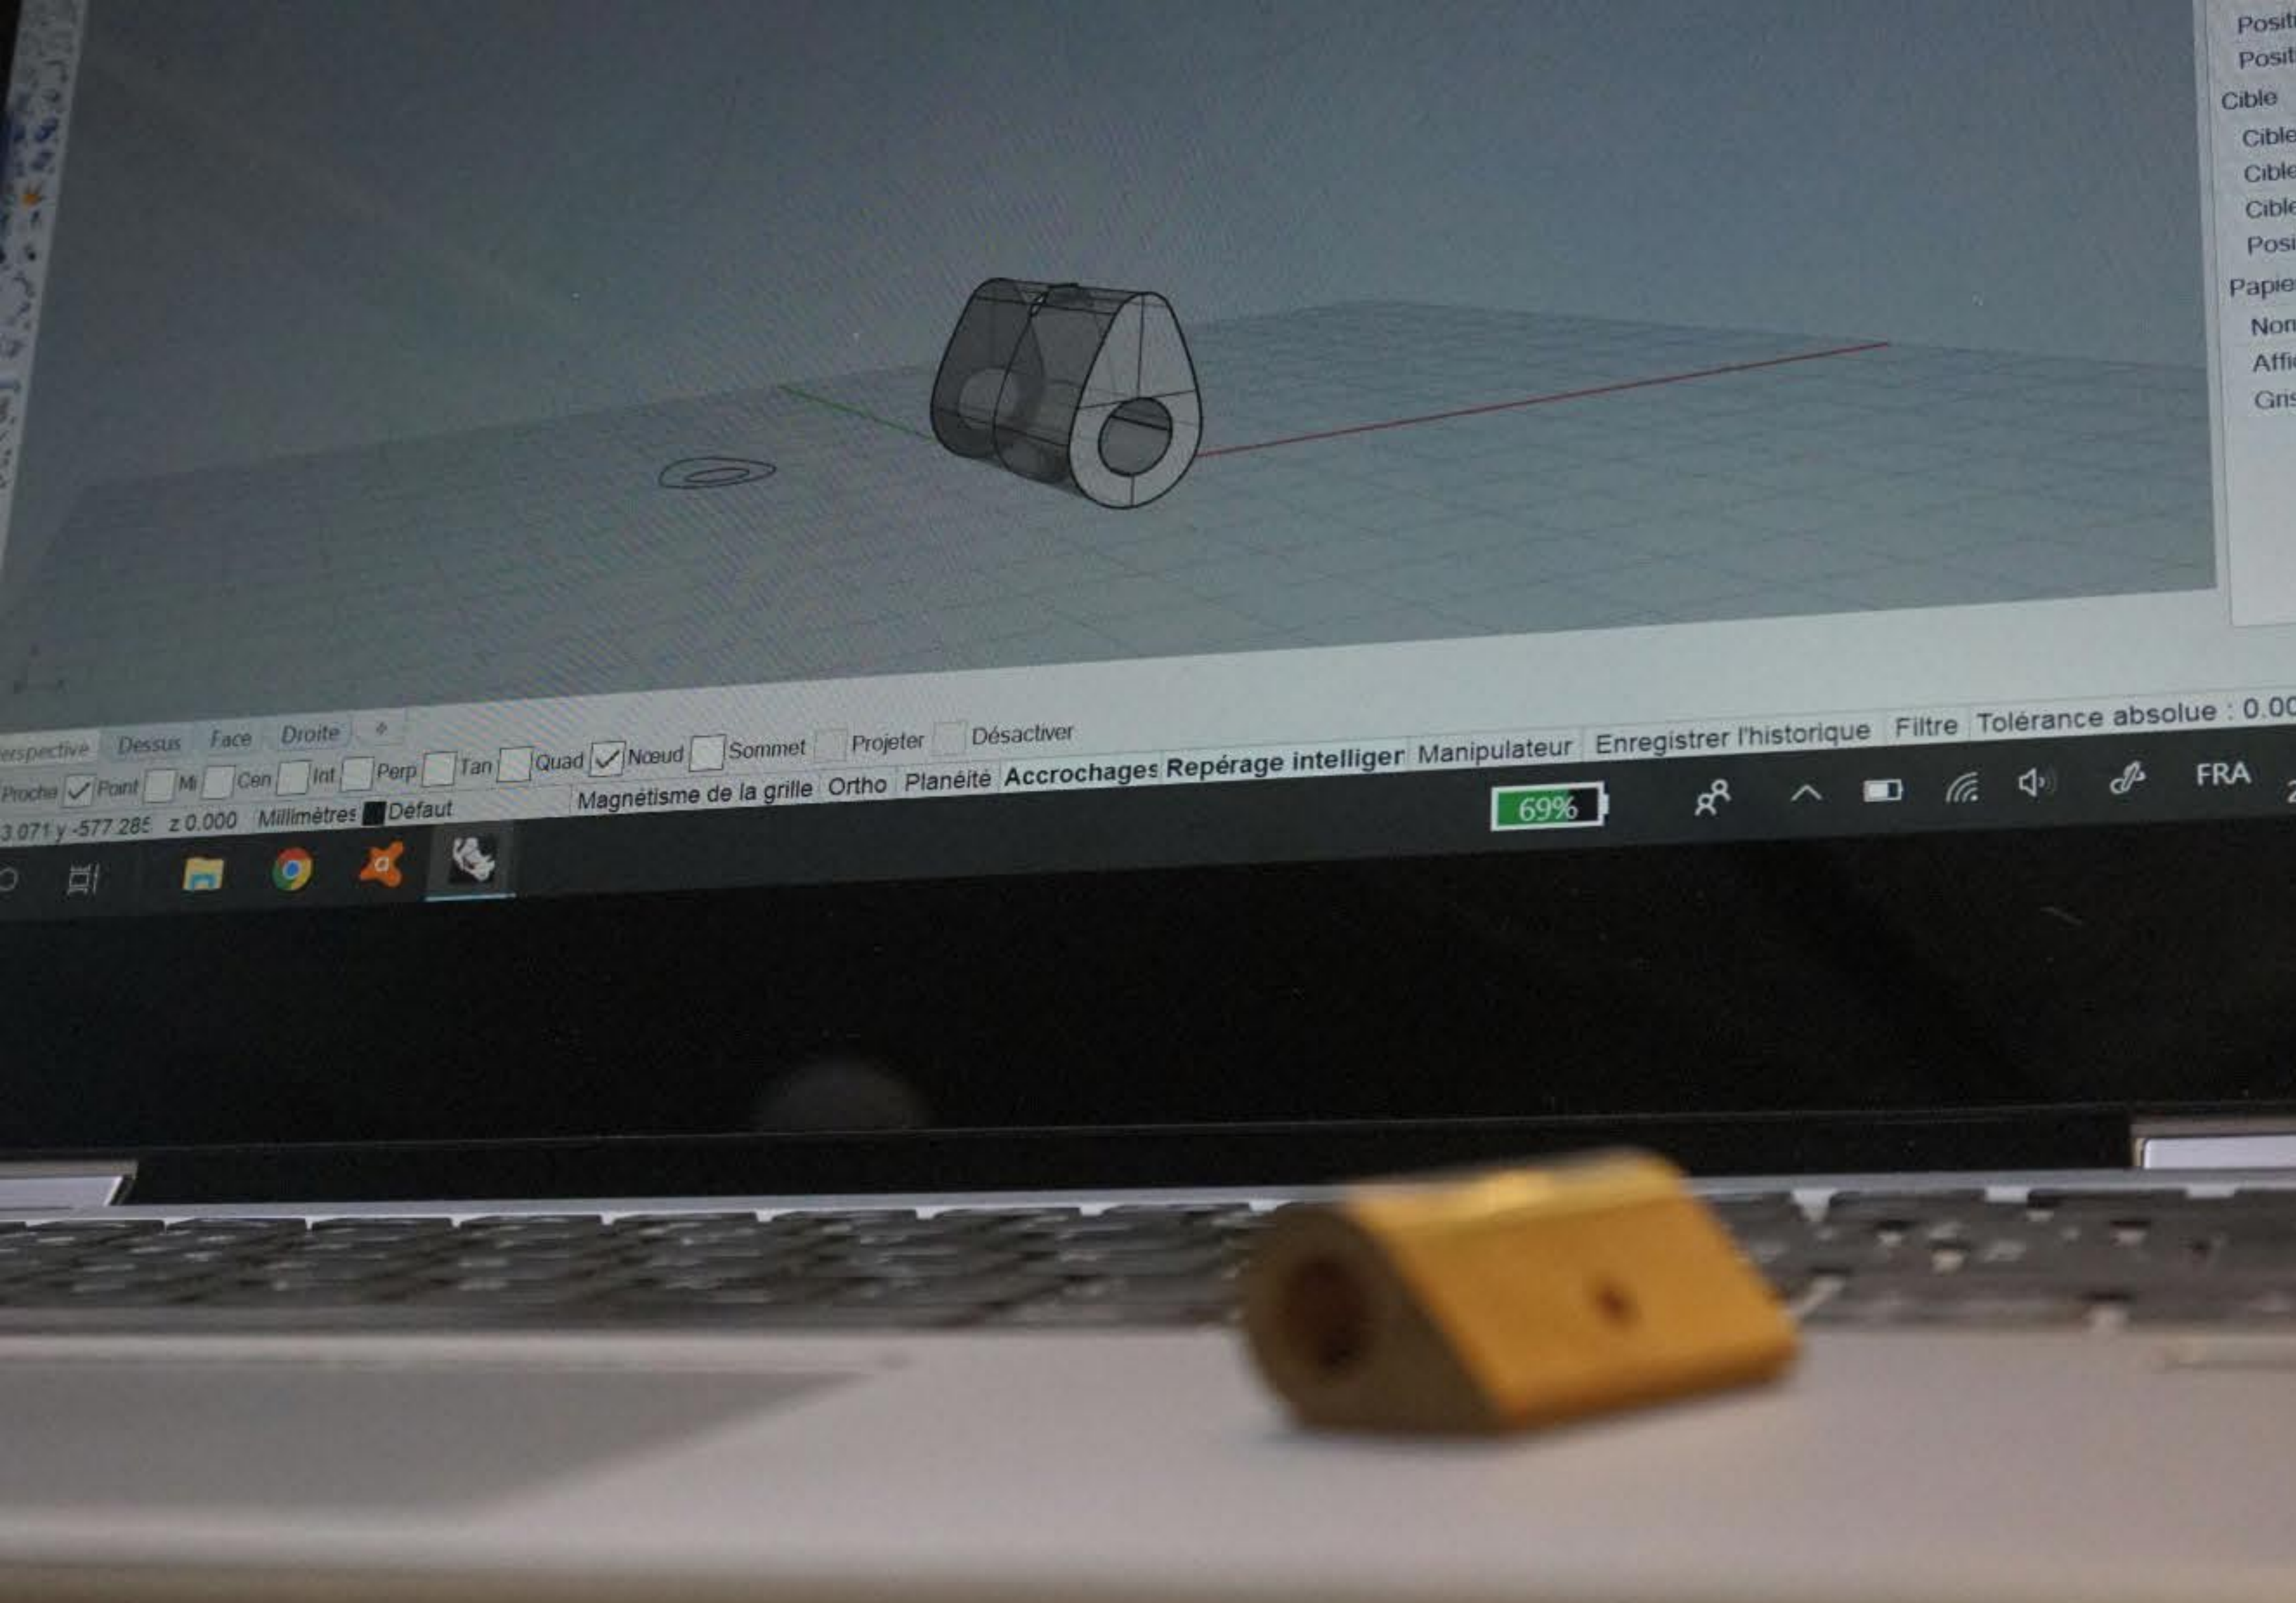

In constant evolution, the studio combines traditional methods and new technologies.

Each component is created in-house and then made by us or one of our sub-contractors.

We can develop a new component or piece of glassware for a specific project.

Our lights are assembled and tested in our workshop.

It also endeavours to encourage meetings and collaborations on the basis of varied projects.

VALUES AND KNOW-HOW

MADE JUST FOR YOU

A light from our existing collection can be adapted to suit the place in which it will be installed.

We have a large collection of comments.

The size of our lights can be modified and the components assembled in an infinite variety of possible combinations.

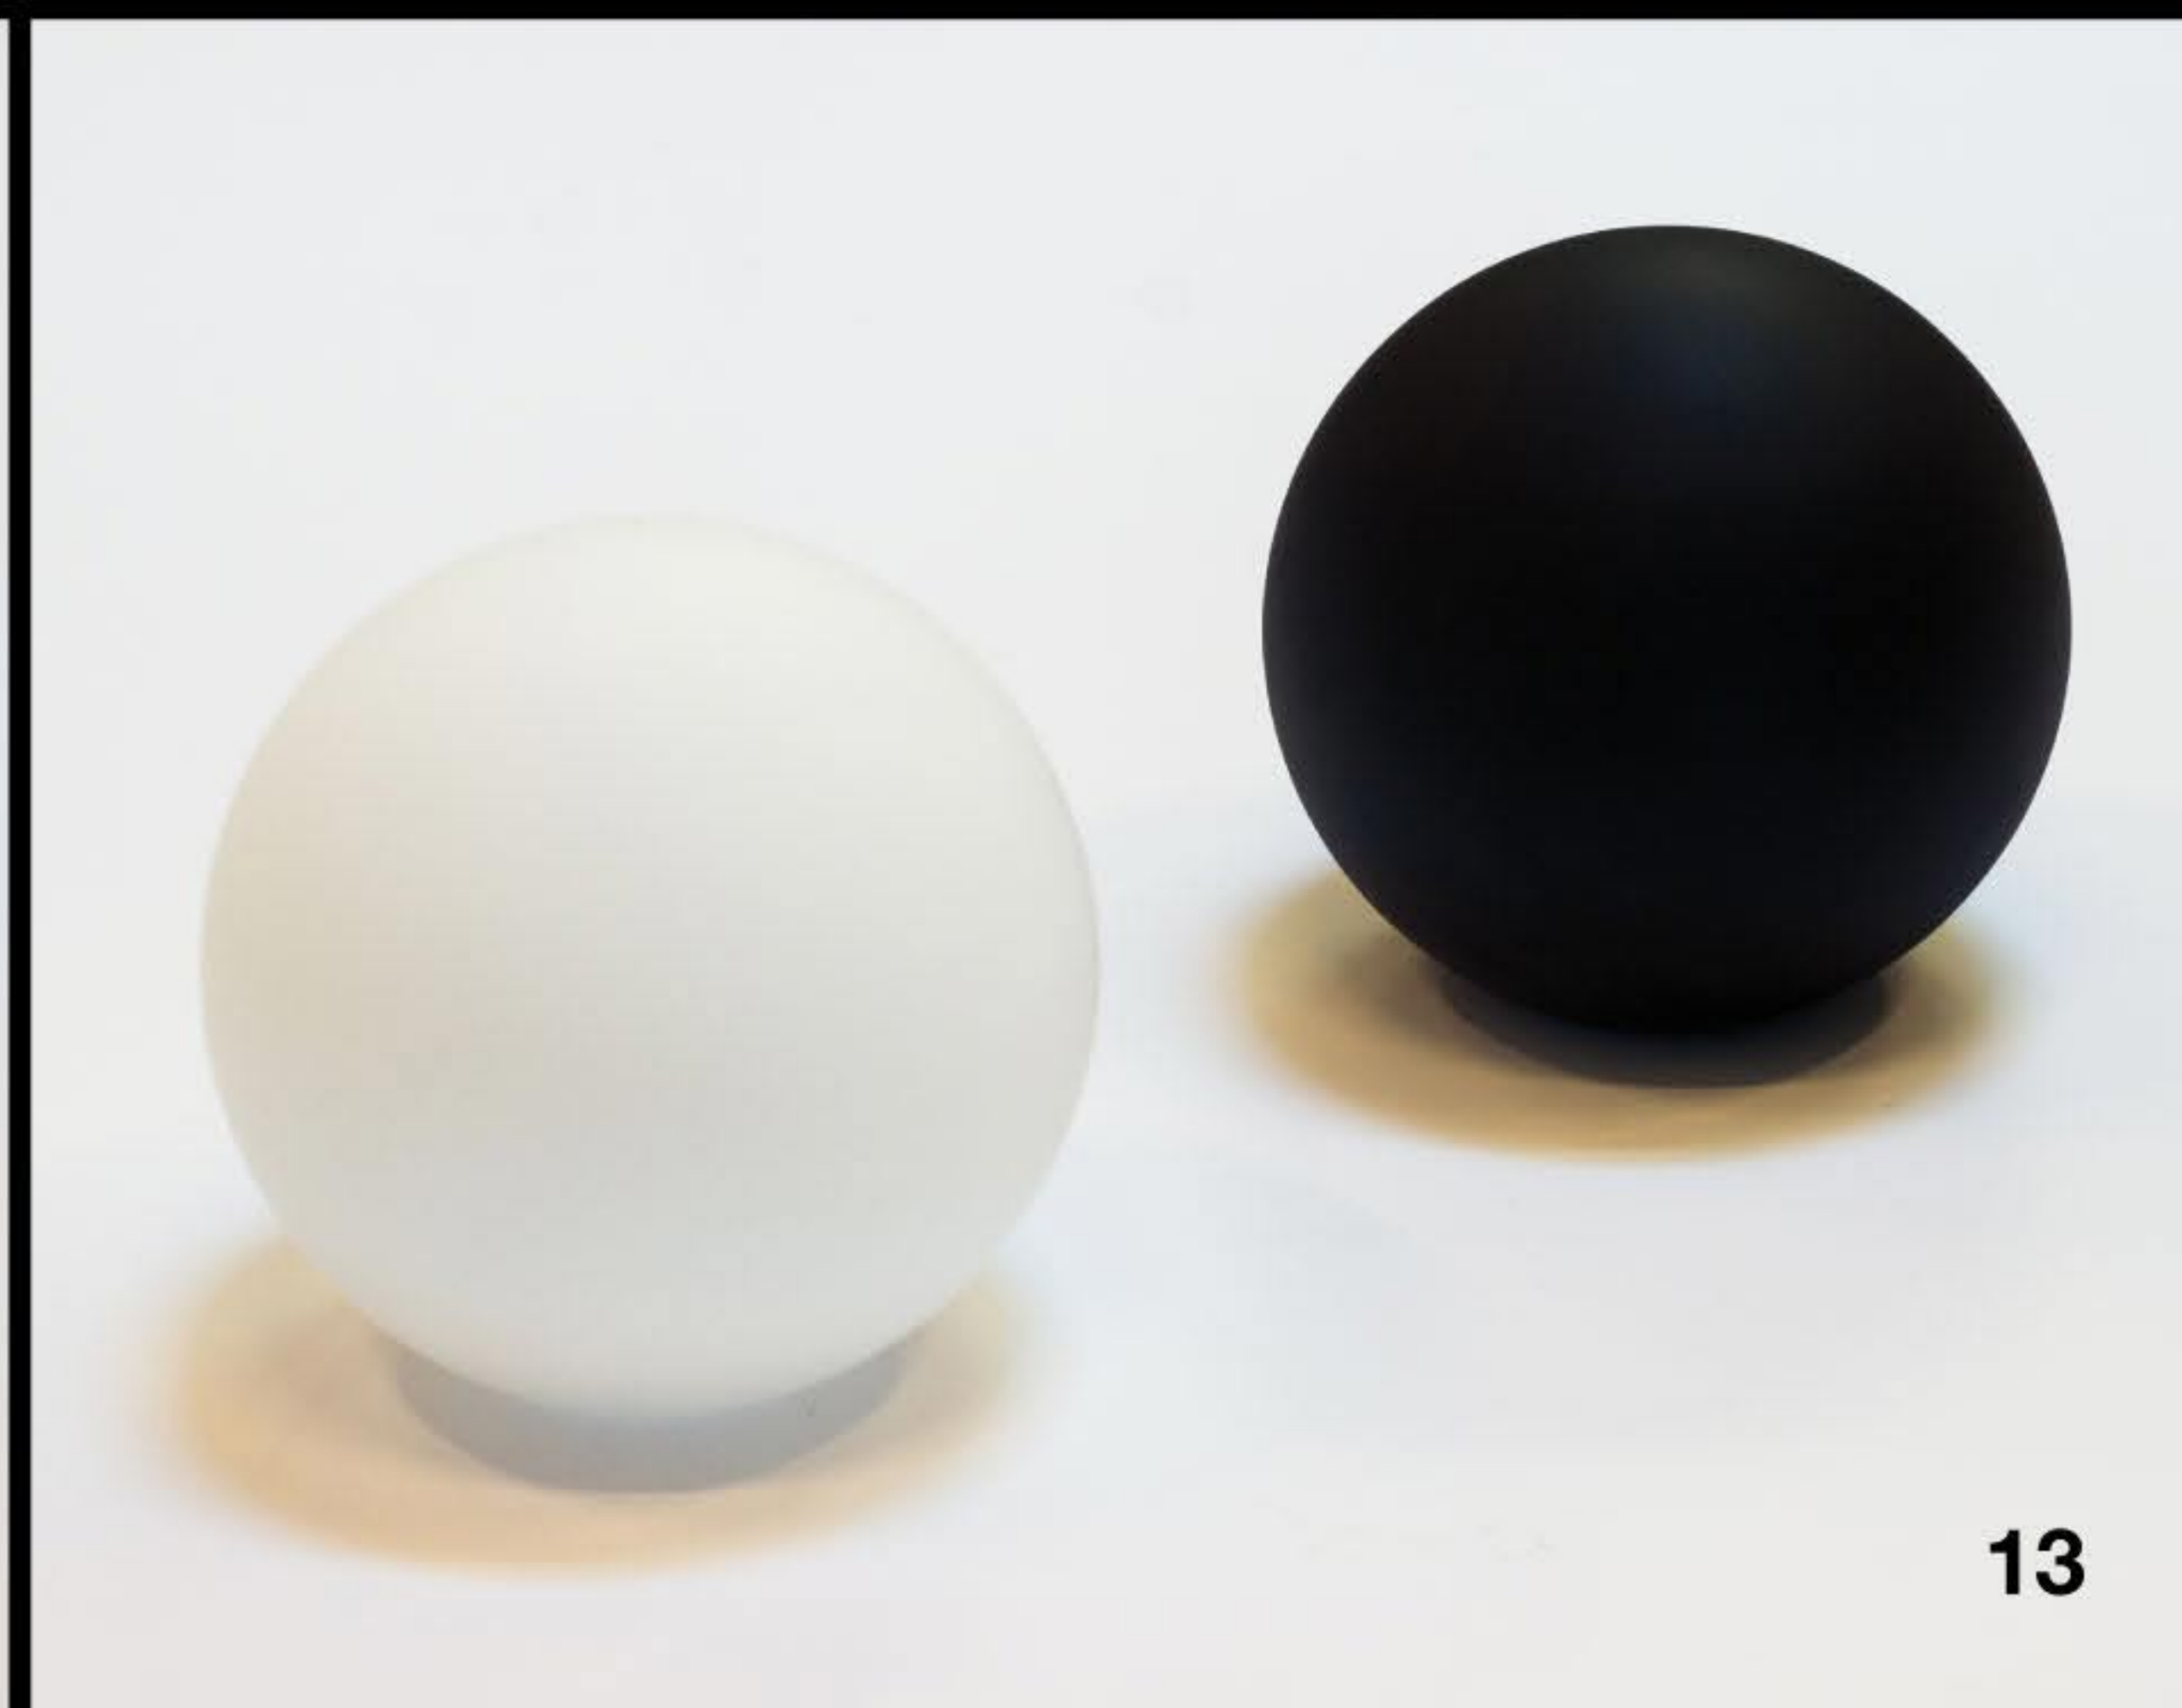

OUR MATERIALS

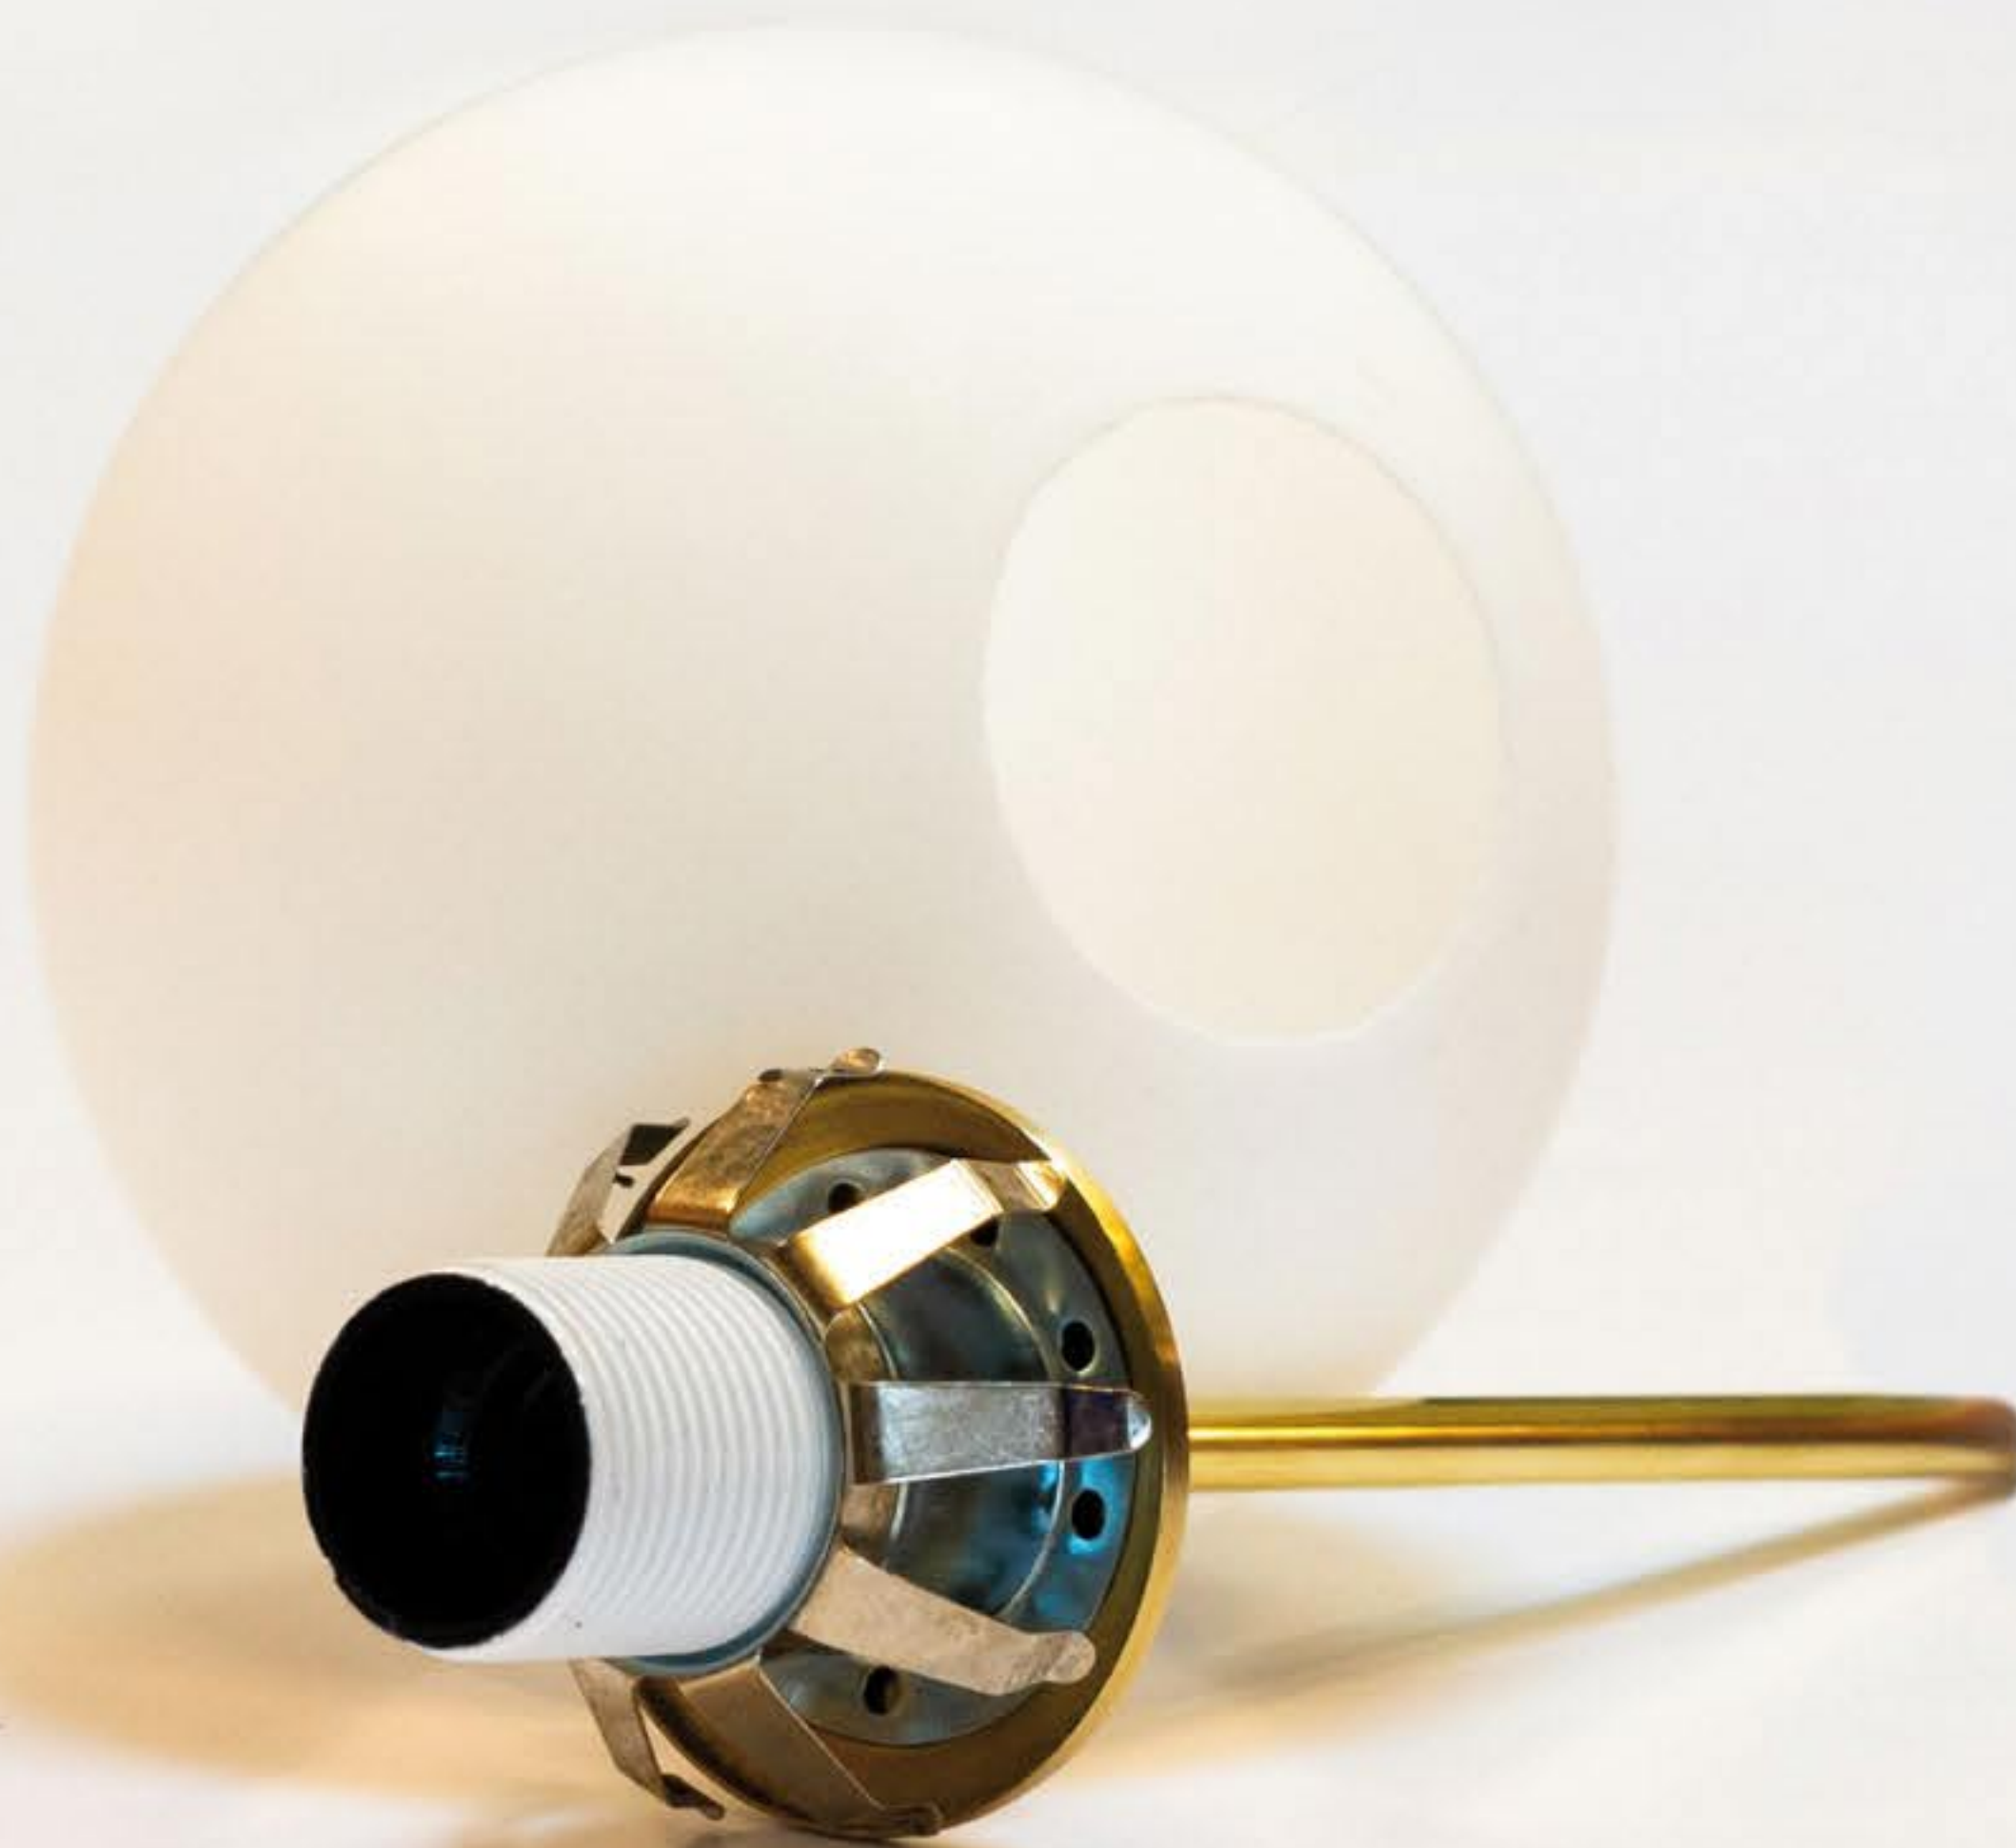

Our brass components can be oxidised to give them a patina.

Our hand-blown glass globes are available in different sizes (12 cm, 15 cm, 20 cm diameter) and different tints.

ADAPTIVE LIGHT

We do not use integrated lighting systems in our lights but rather standard LED bulbs, which can be replaced at the end of their life.

You can choose the heat (2,700–6,000 Kelvin) and the intensity of your light bulbs (200–1,000 lumens).

Our lights are compatible with European and American standard light bulbs and with an LED dimmer switch.

A PROJECT ?

Whether it is for housing projects or those for hotels, bars, restaurants or shops, Gobolights is able to offer lights tailored to your needs.

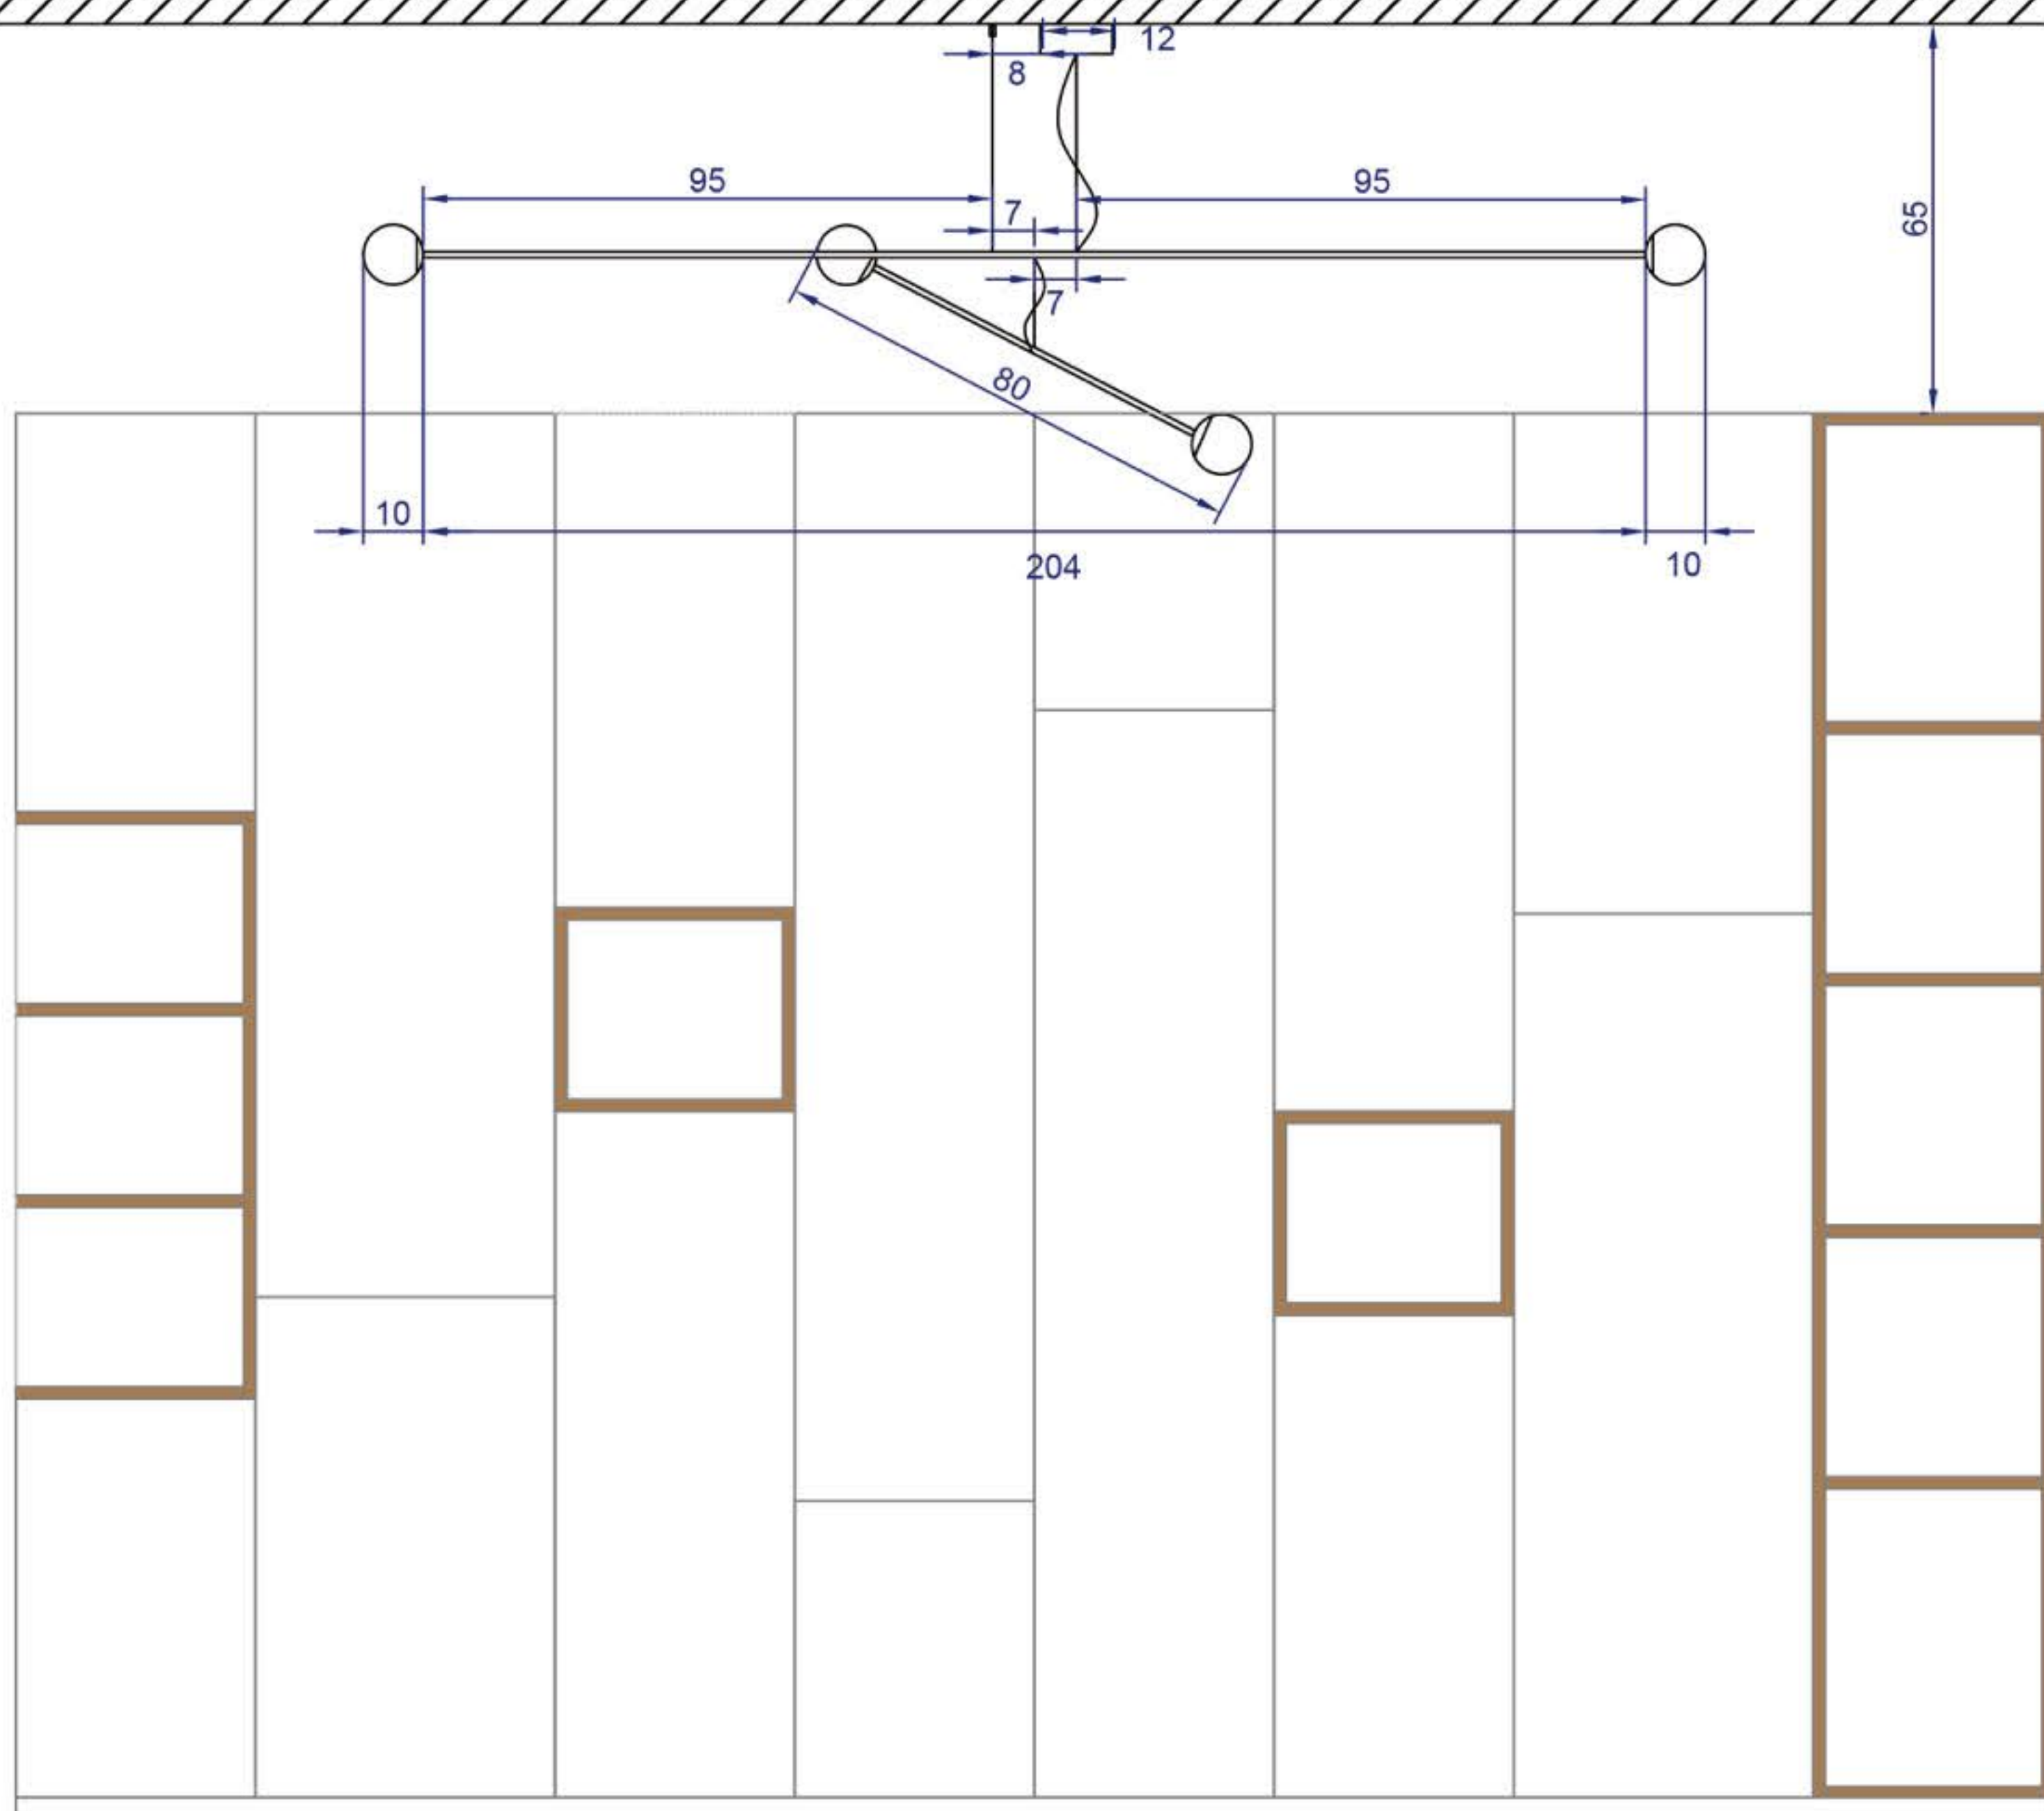

We are available to imagine a new creation developed in collaboration with you!

CASE STUDY

We will study your request on the basis of a 3D image, a sketch, a photograph or an appointment in our studio or on your premises and send you a reply regarding the feasibility of your project as soon as possible.

PR 2

A proposal with the technical details, a 3D image and an estimate of the costs will then be forwarded to you.

Once you have accepted it and lodged the requested down payment, your light will be manufactured in two to four weeks.

INSTALLATION & DELIVERY

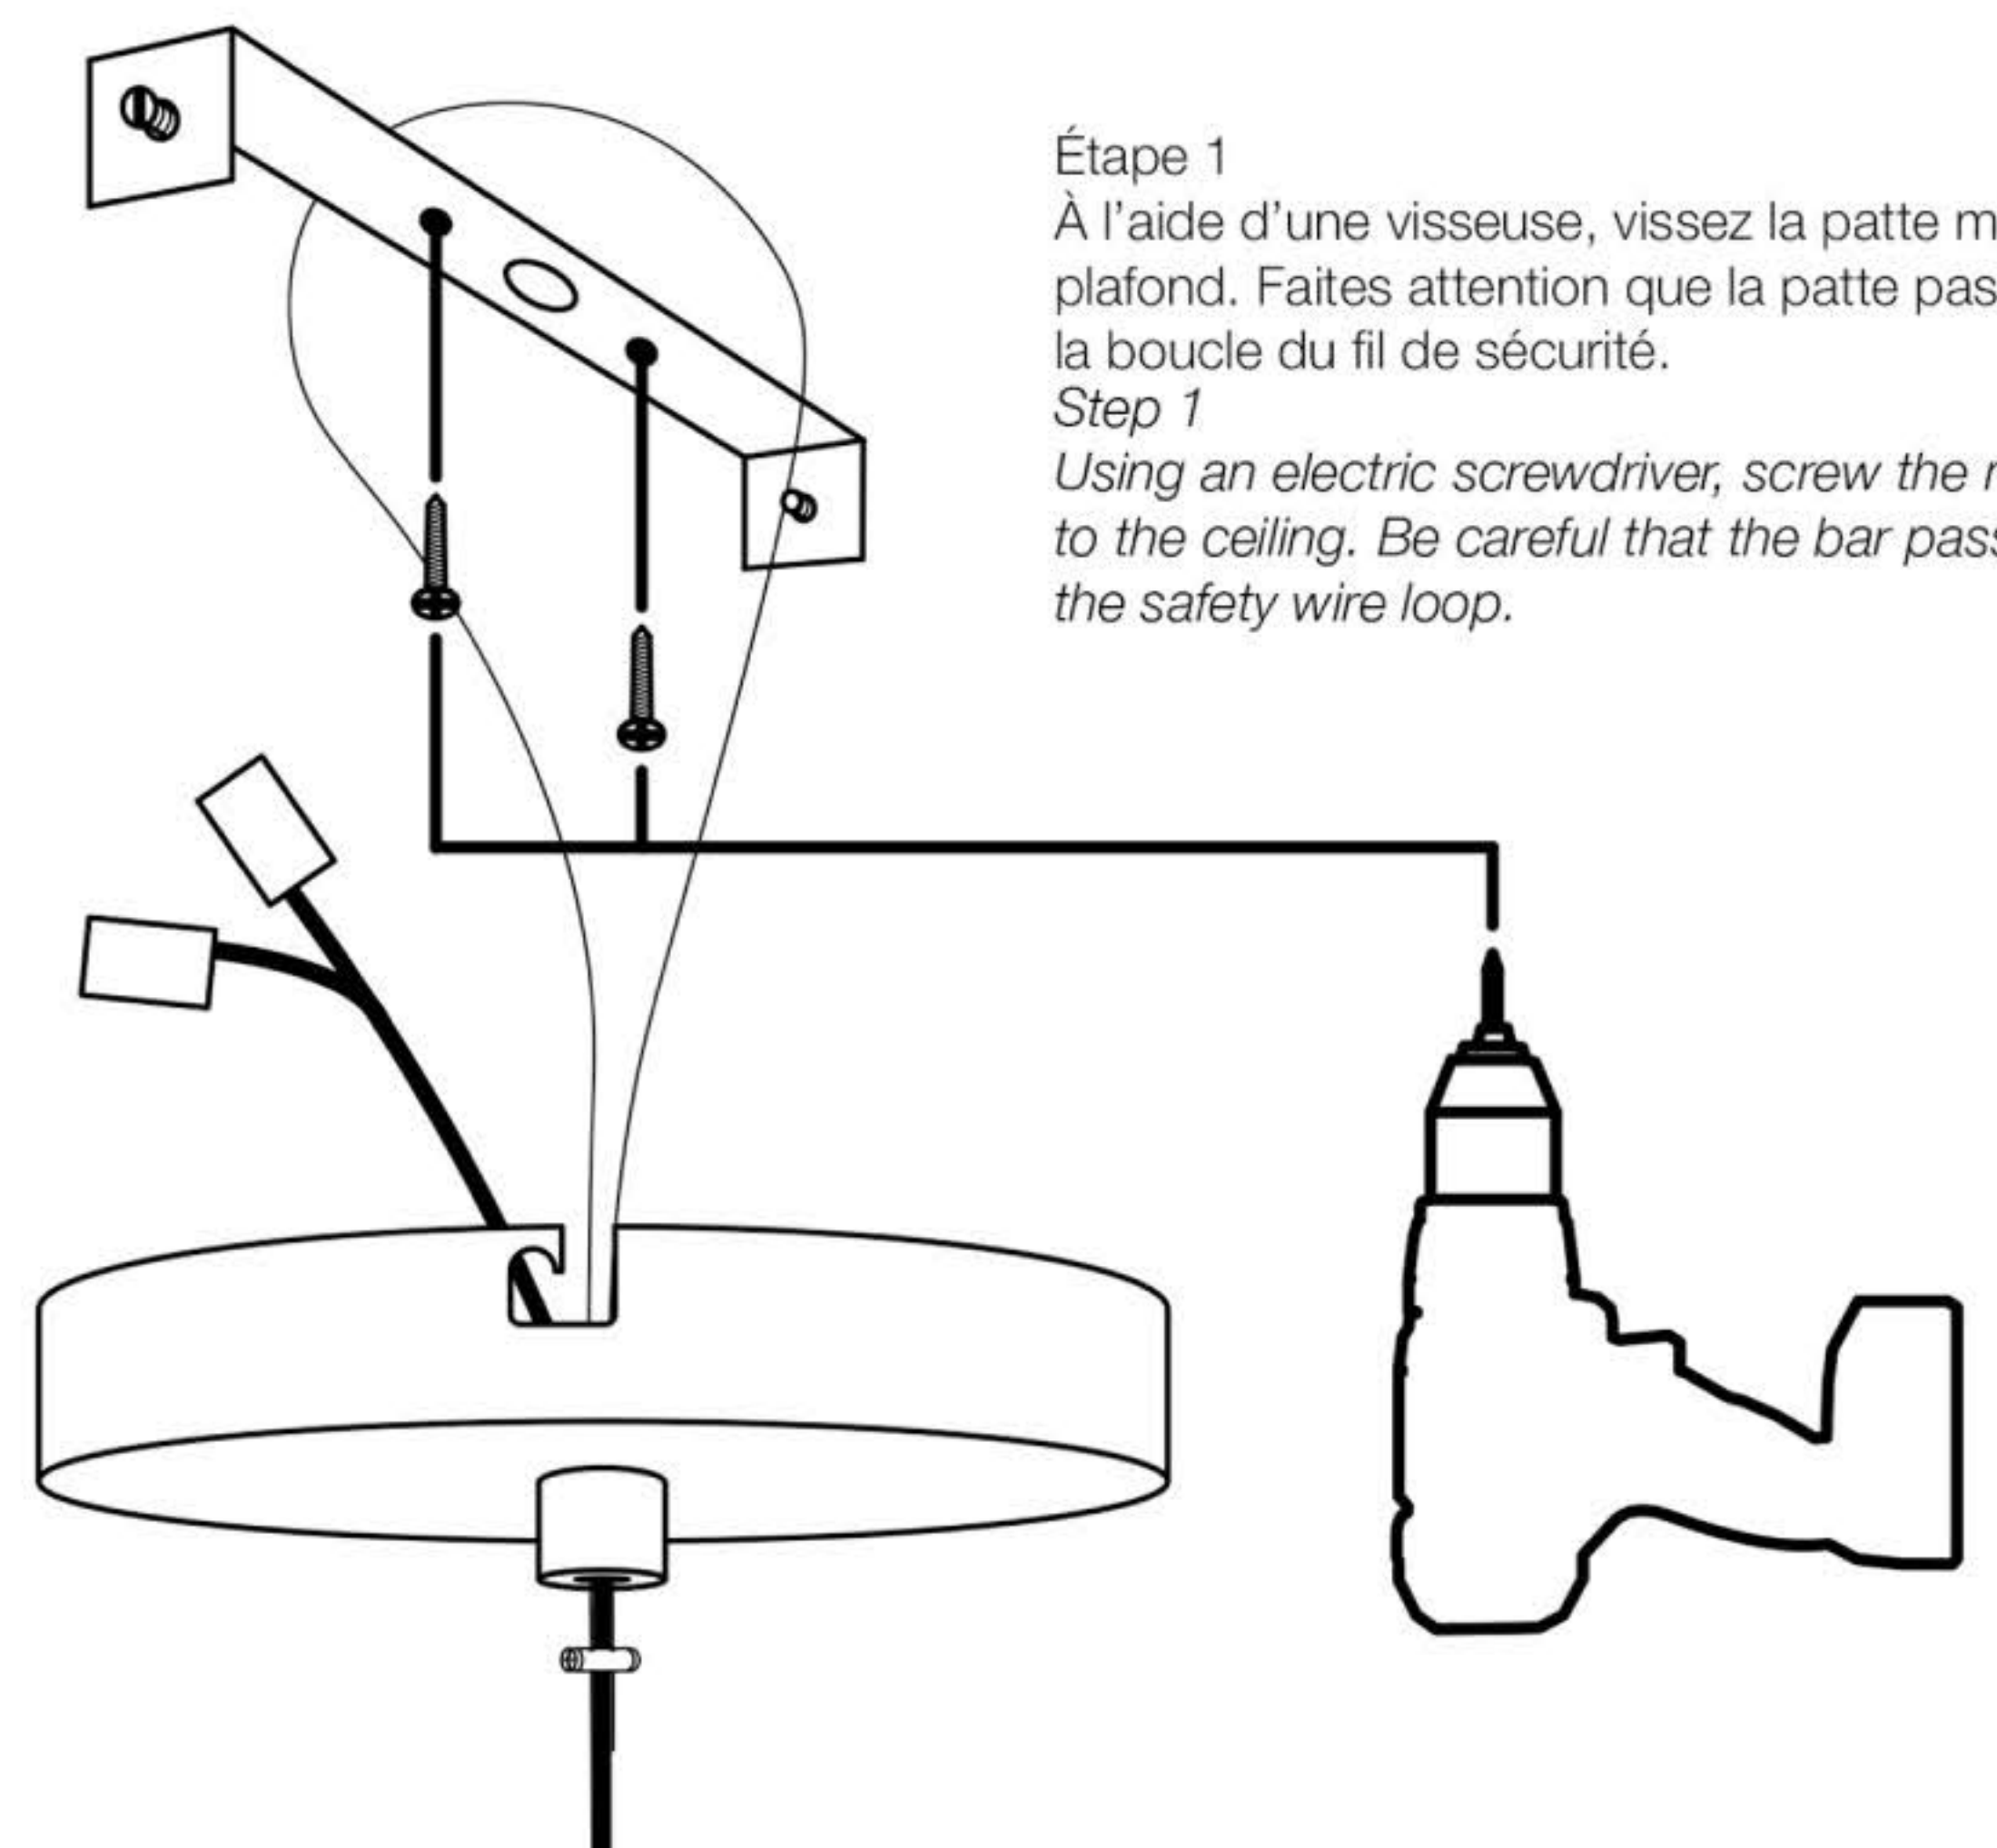

We can assist you with the delivery and installation, if necessary.

Each light is delivered with its technical sheet, its 3D model and instructions for its installation. Our documentation is available on our website (technical details and instructions).

MONTAGE / ASSEMBLY

Étape 1

À l'aide d'une visseuse, vissez la patte métallique au plafond. Faites attention que la patte passe bien dans la boucle du fil de sécurité.

Step 1

Using an electric screwdriver, screw the metallic bar to the ceiling. Be careful that the bar pass through the safety wire loop.

BRASS & OPALINES COLLECTION

18

Inspired by art déco movement, "Brass and Opaline" collection is an ode to simplicity combined with luxurious finishes.

Lighting with pure lines where geometric shapes and curves are honoured.

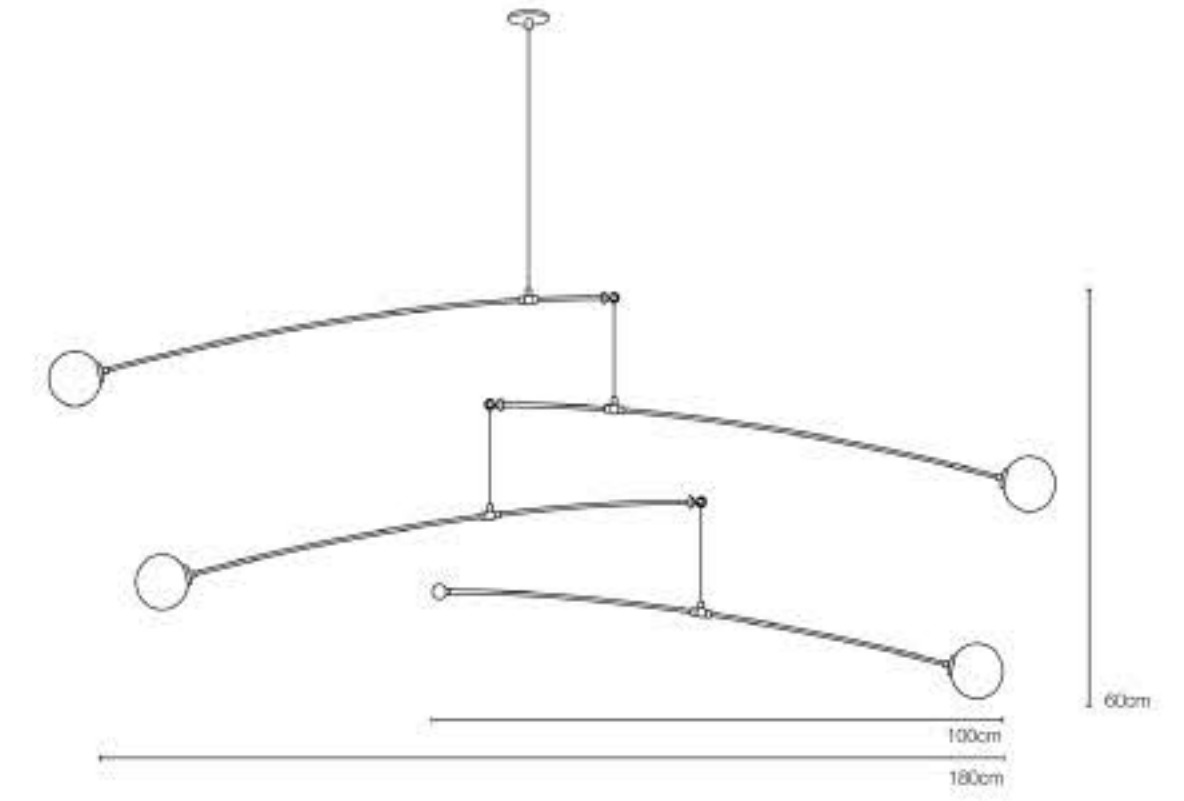

Brass and glass are the only two materials in this collection.

CAPSULES **COLLECTION**

Our collaborative creation or limited-edition

GOLDEN RATIO

A collection of 20 geometrically shaped lights inspired by the golden ratio, they dress and enliven the space with their play of light and shadow.

GOLDEN RATIO

Tamawa X Gobbo Lights

Tamawa, is a brand of contemporary design objects created in 2008 by designer Hubert Verstraeten.

This brand has a clear identity, the bakelite ball, used as the main material and component for all the products in his collection.

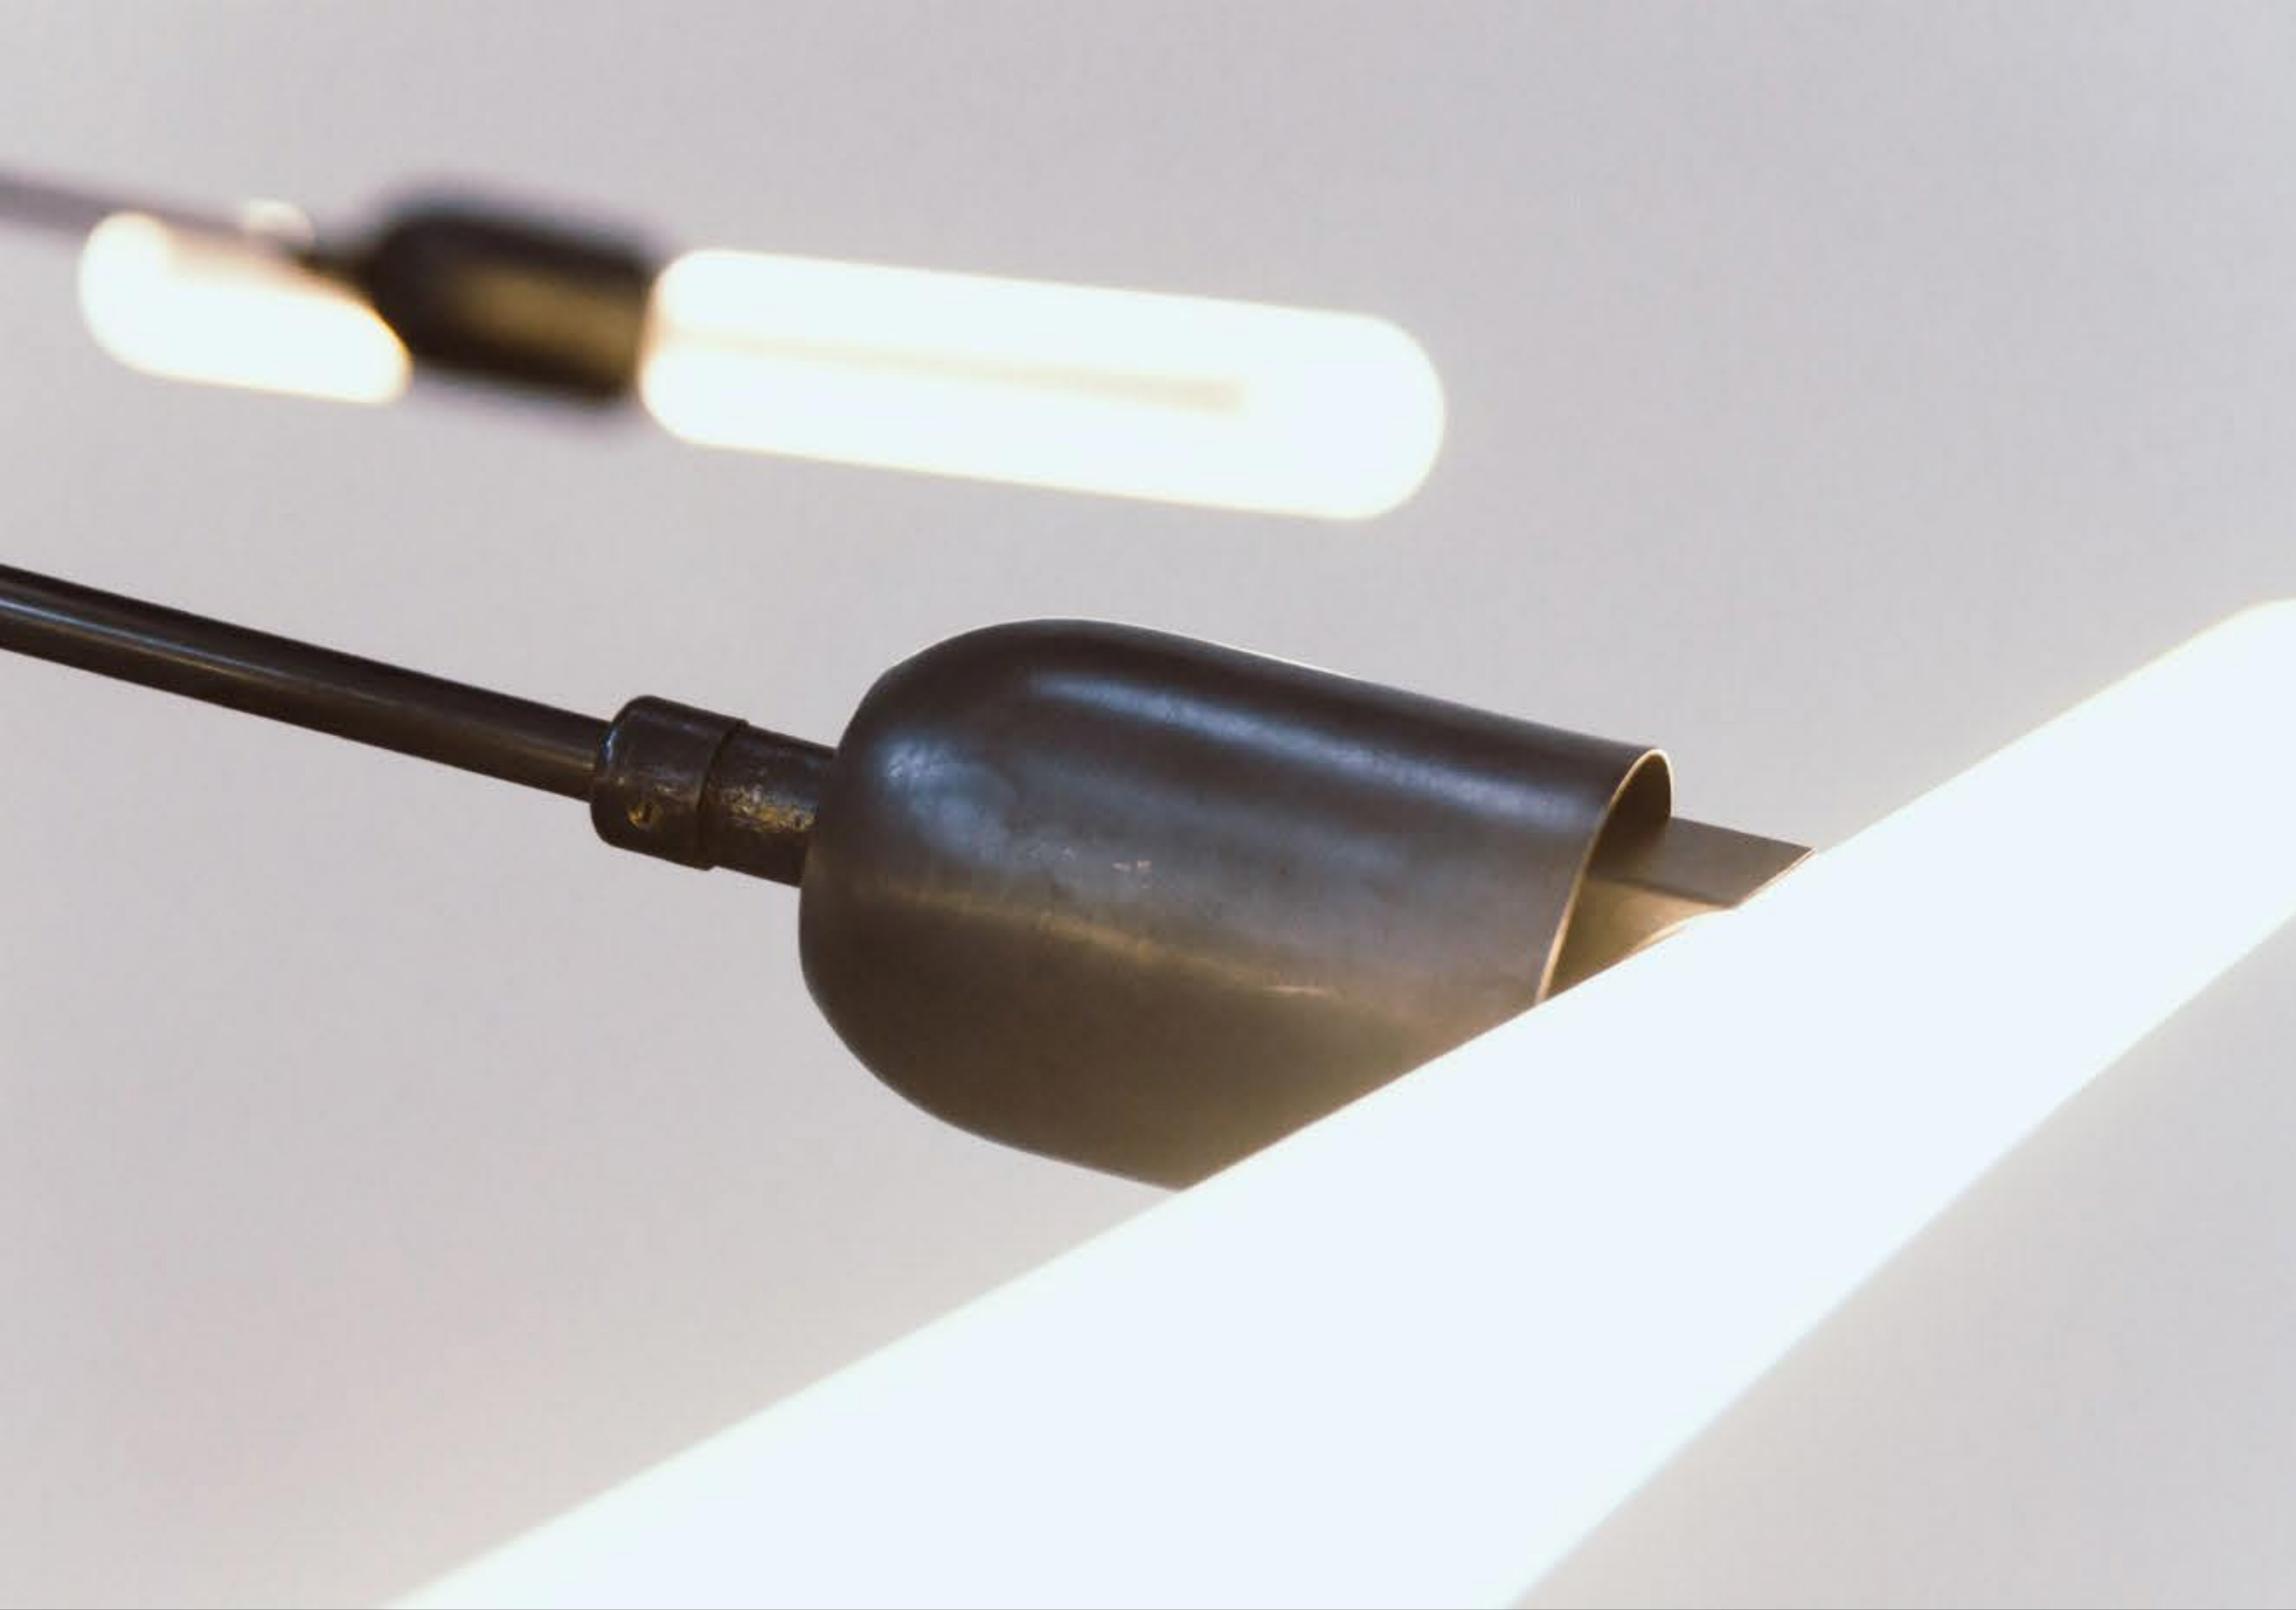

He is also the main subcontractor for our machined brass pieces.

<http://www.tamawa.be/>

Materials :

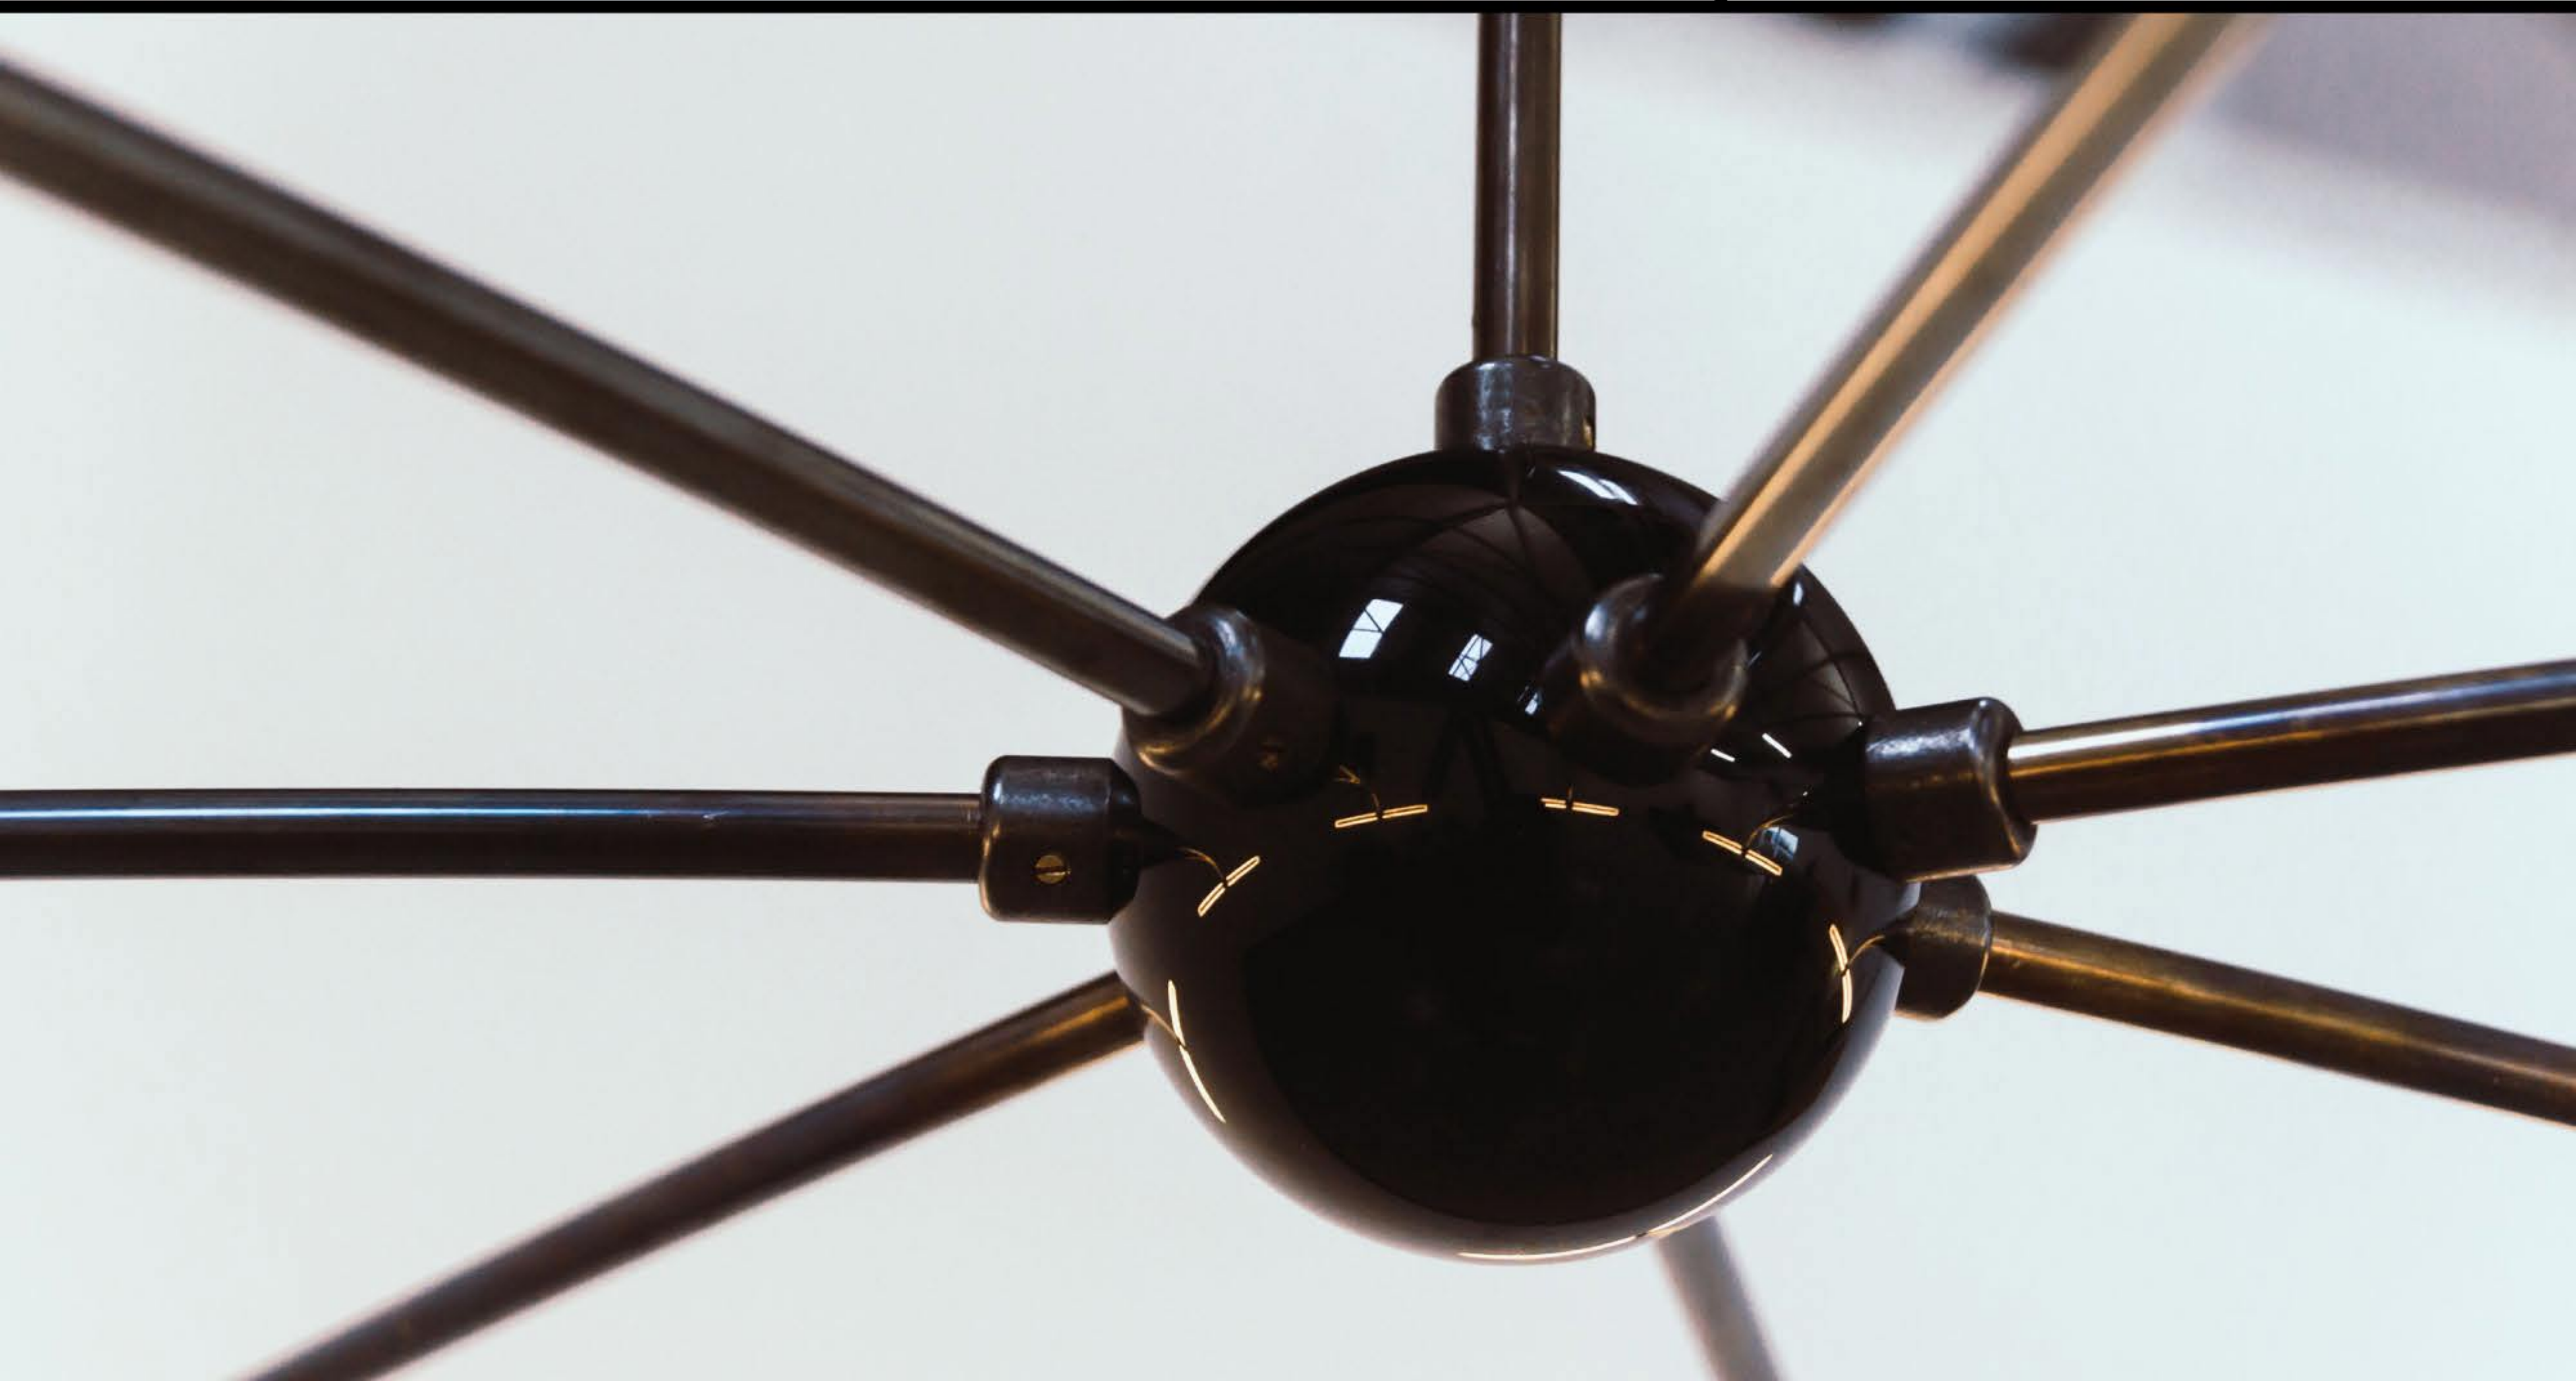

Blackened Brass

LED Tube S14D, 12w, 500lm, 2200k, dimmable

In this collaboration, the main connector is a bakelite ball made by the Tamawa studio.

This connector offers the possibility of connecting up to 7 branches.

LES PIEDS DE BICHE X GOBO LIGHTS

Les PIEDS DE BICHE, a house created in Brussels by Diam Coly, offers a range of decorative objects with a modern and poetic spirit.

Geometric patterns, delicate colors and pure lines thrive on raw and authentic materials thus highlighting their qualities.
<http://www.lespiedsdebiche.be/>

From this collaboration was born a lamp in which the respective materials of the two designers are found.

Concrete for the tray and brass and glass for the light.

Material :

Tray : Black concrete & white granite

Light : Brass

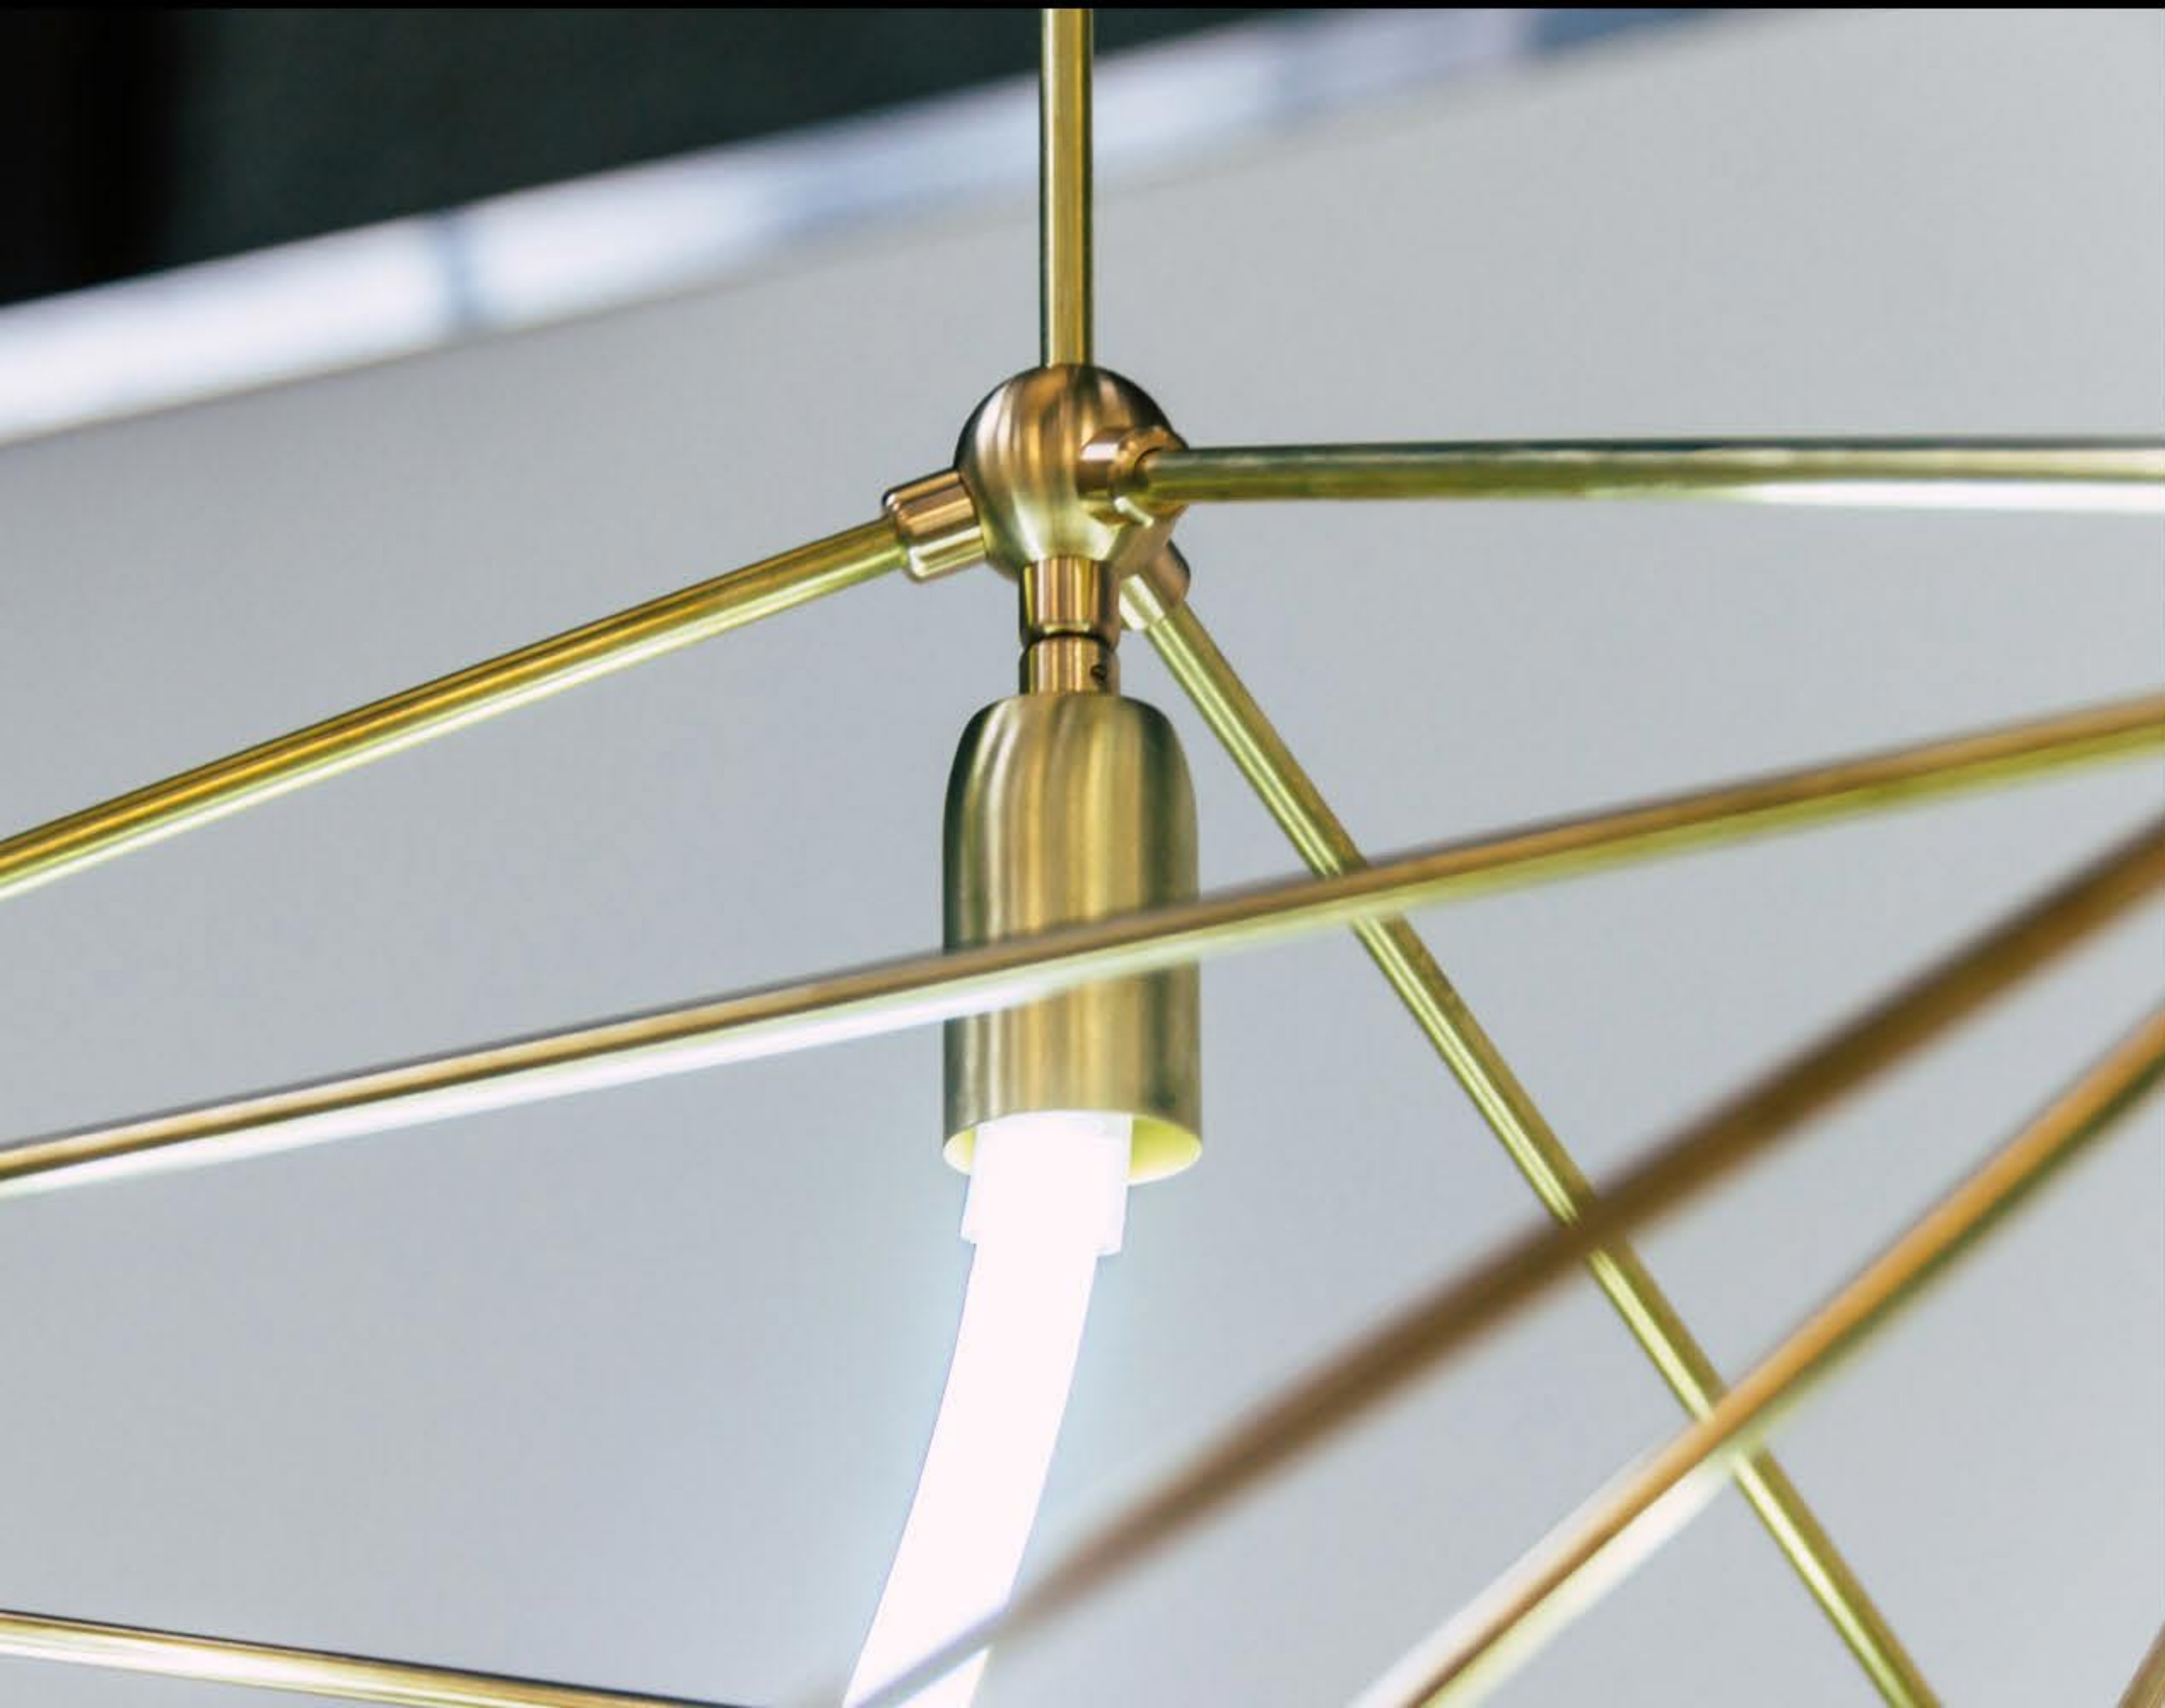

Bulb : Mouthblow mat opaline (12 cm diam).

Led E14, 550 lm, 2700 Kelvin, dimmable.

NÉON FLEXIBLE

Our lights are now available with a flexible neon (360 °), you can sculpt the shape of this light yourself.

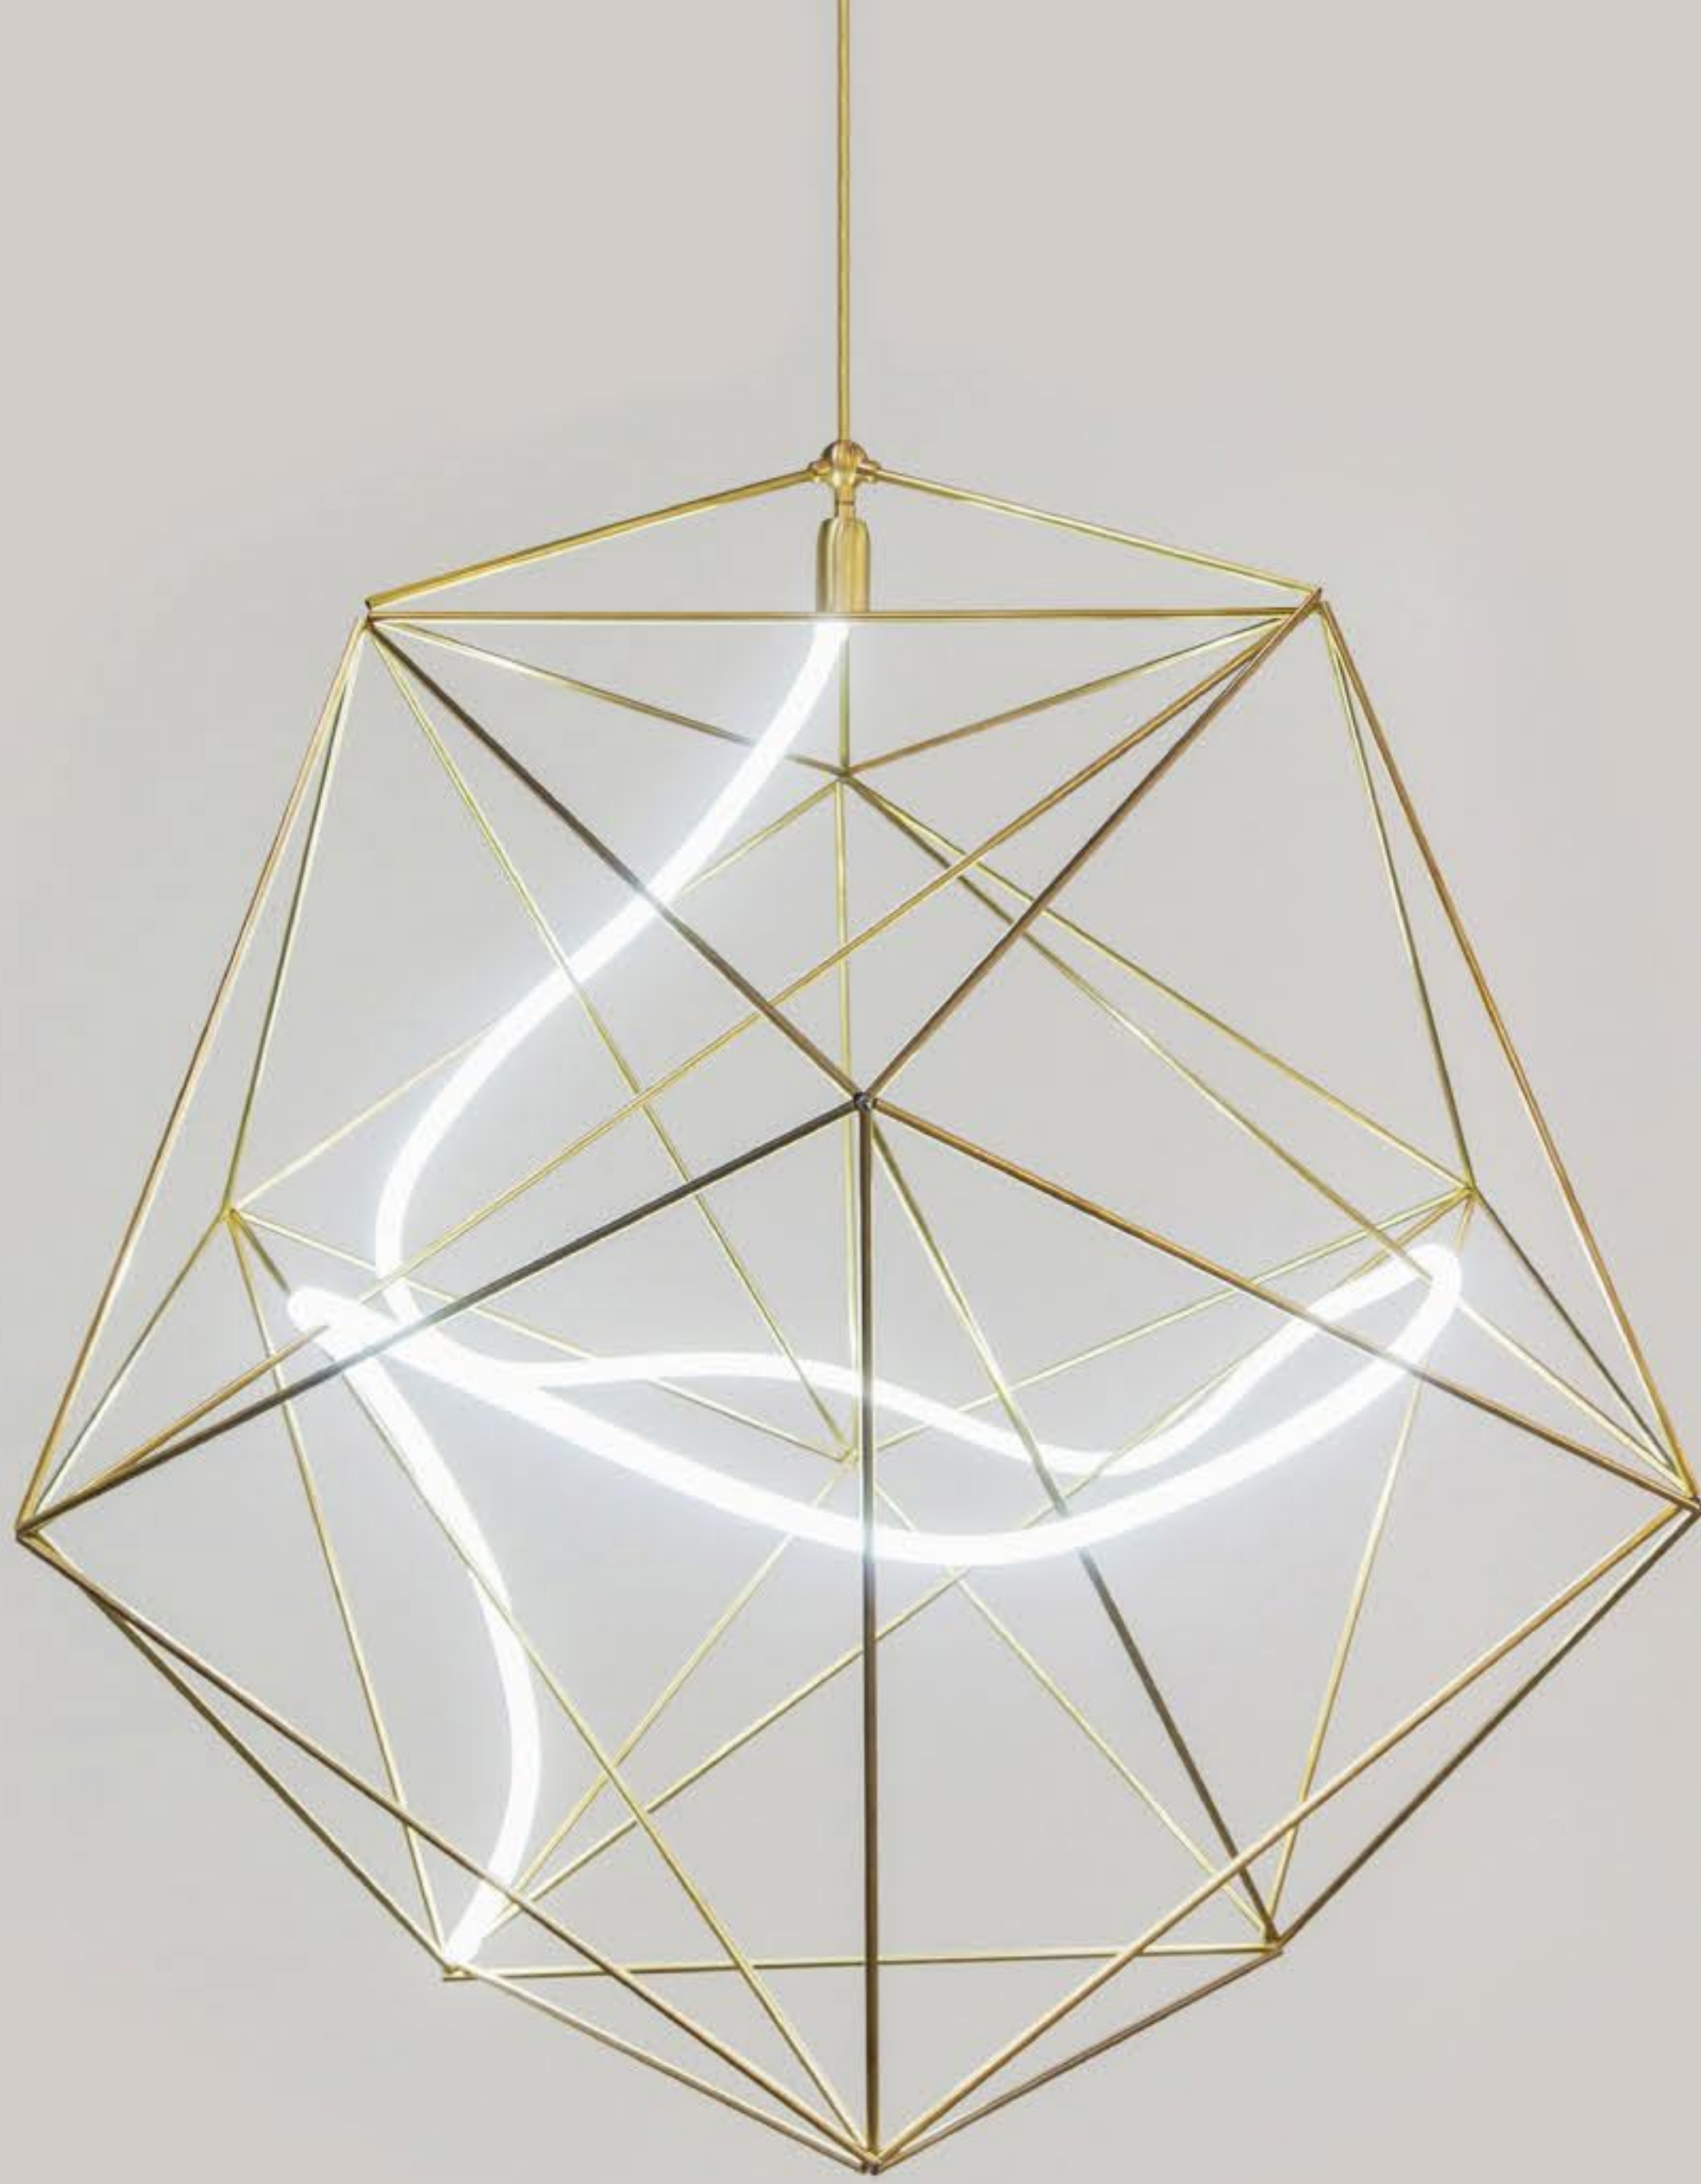

A veritable sculpture, this light represents the relationship between the golden ratio and geometry.

This proportion found in nature but also used in art, architecture and design.

LUMINAIRE **SCULPTURAL**

It's up to you to draw with the neon in the 3 golden rectangles that make up this light.

This sculptural light will bring a creative touch to your interior.

Contact

- Our studio / showroom is located in Brussels at La Vallée, a creative coworking space of a hundred projects on 6,000 m².

The studio is open by appointment during the working week from 10 a.m. to 6 p.m. It is also possible to arrange appointments during the weekend and in the evening.
