

MATHY BYBOLS

THE BELGIAN CREATIVE FACTORY

About Mathy by Bols

Fairly unusual in its sector, Mathy by Bols is a furniture manufacturer that has been able to solve the difficult problem of producing a high volume, quickly and with short, guaranteed lead times, while also maintaining the quality of genuine craftsman-made furniture. The Mathy by Bols catalogue offers a wide variety of products in many different color ranges. Because each family and each child are unique, we want to offer you the widest possible choice.

The Treehouse bed

Mathy by Bols stands out from other brands with their creative beds. The Tree house bed, bestseller of the brand, is a timeless bed that a lot of children would like to have in their bedroom. The main idea of this design is simple: return to childhood, to adventure and to the carelessness. With this tree house, the Designer François Lamazerolles restarts adventures and imagination.

designed by François Lamazerolles in collaboration with Mathy by Bols

A Montessori approach

According to Maria Montessori, the child needs to learn on his own. The Discovery and Asymetry collections are part of this pedagogy and helps develop the motor skills of the child. The Discovery bed is part of Montessori's active pedagogy. The bed evolves and accompanies the growth of the child. From simple floor bed to canopy to bunk beds, Discovery is an evolving bed that can be adapted to the needs of the family. Thereafter, it can be raised to a more conventional height and even accommodate a drawer bed. This original model allows the child to discover the world while creating his own. The elements of the design suggest the movement but they are open to interpretation. It may as well be associated with a means of locomotion than the stall of the street vendor or an ice cream seller. All dreams are allowed...

Asymetry is a range of storage furniture with soft and asymmetrical lines based on the active pedagogy developed by Maria Montessori. Asymetry enables to develop the autonomy and motor skills of the child from an early age by offering scalable furniture adapted to the height of the child. This collection is composed of a wardrobe, a shelf and a desk. The child can easily access to his belongings, choose by himself and make his own decisions independently.
