

# Introducing Twirl Side Table

by Nikki Alagha Design

A playful spin on the side table, Twirl combines function, aesthetic and interaction.

---

May 1, 2020

Twirl is a unique twist on the side table. Born from the idea that furniture should be engaging and playful, as well as functional. The top surface is a multi-layered turntable of colored patterns on top of a mirror. Inspired by kaleidoscopes, each pattern can be rotated (or twirled) creating moving reflections of the environment around it.

The surface can also be lifted to reveal additional storage inside. Twirl is made of powder coated aluminum, painted acrylic and glass. A common object that can be used in an unfamiliar way, Twirl side table combines function, aesthetics and interaction.

A piece of furniture that sits between the two worlds of art and design.
